Harvest With a Case Kerosene Tractor

This is the new and better way. It means more work, easier work and done exactly when you want it.

The Case 10-18 Kerosene Tractor pictured above is especially recommended for haying and harvesting. It is the smallest of our four sizes.

It is the simplest, most powerful tractor built. It will pull two 14-inch plows under all reasonable conditions, two 6-foot binders, a 22-shoe grain drill, a 5-section spike-tooth harrow, an 8-foot double action disc harrow or a large manure spreader.

For belt work it is very practical. It will easily drive a Case 20x28 Thresher with feeder and wind stacker, a No. 12 Case Silo Filler with 40-foot blower, Baling Press, Feed Mill, Small Corn Husker or Sheller.

This tractor is used by progressive farmers all over the land. It is made by the J. I. Case Threshing Machine Company, famous for 77 years among farmers. No tractor is its equal. No finer can be built.

We will be glad to tell you all about this and other Case Tractors if you will give us the opportunity.
