

New Crank Case Service for Motorists

YOU probably know that after a few weeks of driving your lubricating oil becomes dirty with carbon, road dust and fine particles of metal, which circulate through your engine and cause unnecessary wear on bearing surfaces. And gasoline escapes past the pistons and dilutes the oil. Granted. There's nothing new about that—but—

Here's an absolutely new way to get rid of this dirty, diluted oil and put your engine in line for better performance and longer life. It is called Modern Crankcase Cleaning Service.

Modern,—because we use Calol Flushing Oil, the new, scientific,

thorough flushing agent that does not contaminate the fresh oil.

Our skilled mechanics know how to clean out a crankcase with it correctly and quickly, at a nominal cost to you.

This service assures proper lubrication for your cleaned engine. We refill the crankcase with fresh Zerolene of the correct grade.

We recommend Modern Crankcase Cleaning Service as the latest word for better engine operation and longer life for your car.

TODAY: Bring in your car for Modern Crankcase Cleaning Service.

EASY TO CAPTURE PERFUME

Simple Method by Which Lovers of Sweet Odors May Gratify Their Olfactory Sense.

Few people know how easy it is to capture the fragrance of real flowers. The first step in the plan is to procure a glass funnel. The small end of this instead of opening should be drawn out to a fine point. Some means must be adopted to maintain the funnel in an upright position. A little stand made of wooden uprights and wire is shown in the illustration. Any kinds of highly scented flowers, such as roses, may be gathered; these should be in fresh condition as, just after opening, the fragrance is at its best. Place these in a vase filled with water so that they will not wither. Now get some ice and crush this into small fragments.

using it to fill up the glass funnel. At the same time place some receptacle under the funnel. Sprinkle salt on the ice and then move the flowers and the funnel into close proximity.

After a while it will be seen that the moisture from the atmosphere is condensed on the outside of the funnel, the surface of which is chilled by the ice. The ethereal odor of the flowers combines with this liquid which slowly trickles down by drops into the receptacle. When a sufficient quantity is secured this may be mixed with about an equal quantity of pure alcohol. The mixture should then be placed in bottles, when it will keep for an indefinite time. In this way all kinds of flower perfume may be captured with the greatest ease.

Only for a Moment Did Misunderstanding Disturb the Happiness of the Fair Belinda.

For seventeen minutes by the clock they had been engaged, and during the first fourteen-seventeenths of that time Bob and Belinda had called each other two hundred and forty-seven endearing names—all different. But for the last three-seventeenths of that period there had been a proud and sorrowful look upon Belinda's face, calculated to wither all thoughts—even of orange blossoms.

The young man plunged his hands wildly through his locks.

"I can't imagine, dear," he said sadly, "what has come over you so suddenly. I simply asked if you were romantic, when—"

"Oh, Bob! Forgive me, dear!" exclaimed Belinda, casting her arms affectionately about his neck. "I thought you asked me if I was rheumatic!"

Insignia for the Deaf

For the protection and greater ease of deaf persons in Holland, a society devoted to their interests has introduced a distinctive button to be worn by those afflicted, says Popular Mechanics Magazine. A small white disk is bisected by a vertical red stripe, the white ground at the sides bearing the letters "S" and "H," initials of the words "bad hearing" in the Dutch language.
