Chevrolet Motor Company Deals With Price Problem in Logical Way

The Chevrolet Motor Company in a recent announcement, deals with the present price problem in a most sensible and logical way.

It seems that a part of the company's program is based on the production of 50,000 Model "Four-Ninety" cars. This model is well known and there are about 500,000 in use. The company proposes to build the 50,000 before August 1, 1921 and if it reaches this number, and it has every reason to believe that it is going to be successful, each purchaser of an open car of the "Four-Ninety" type will receive a refund of \$70, and those who buy closed cars of this type will receive a refund of \$100.

A certificate setting forth the terms of the plan will be given to each retail purchaser and the total number of Model "Four-Nineties" produced by Chevrolet factories during the period which governs the proposed plan will be published not later than Aug. 10, 1921.

Those who purchased Model "Four-Ninety" Chevrolets under the Chevrolet Motor Company's price guarantee of last October, benefit by the refund plan.

During the period of readjustment, the Chevrolet Motor Company, mindful of its duties to its employees, its patrons and the general public alike, refrained from making any impulsive price change. They knew that a drastic cut, based on a guess as to future conditions could have only one effect, the destruction of the nation's buying power. It would tear down public confidence and stagnate the movement of crops and merchandise. It would slash wages and visit sufferings and hardships on millions of people.

But conditions have changed. Raw material prices have found new low levels. Inventories have been readjusted to the bottom of the market and it is there fore possible for the company to make a definite proposition based on quantity production.

We handle House of Irwin Clothes. Eight day service \$38.50 up to \$75. Re Nu Em Cleaners.
