

**Music Hath Charms**

The music loving public of this section enjoyed an exceptionally delightful musicale Monday night at the high school auditorium, given by Dr. Emil Enna, pianist and Miss Clara Coakley, soprano. His program was chosen from American composers and some selections of his own composition. The audience was very appreciative and a burst of applause greeted the artists at the close of each number. Miss Coakley, with her sweet voice, was unaffected and made a charming impression. The musical part of the program was interspersed with readings by Mrs. Herbert Garr Reed, which was thoroughly enjoyed and brought forth a storm of applause and laughter. The program closed with a community sing. Those who attended this recital expressed themselves so well pleased that a return engagement of Dr. Enna at some future date, would be greatly appreciated.

**Base Ball Game**

At Barton, Sunday afternoon, June 5th, a base ball game will be played between the Barton team and one from the Nay Hardware Co., of Portland. It promises to be a snappy one.

## How We Build The Structure of Good Paint

WE make good paints like this—to save you money; and we've put 72 years' experience into them.

We use pure PIONEER WHITE LEAD, pure linseed oil, zinc and color in scientifically exact proportions.

The lead base is made so fine that it will pass through a silk screen with 40,000 meshes to the square inch. That means covering capacity and ease of spread.

A special device super-purifies the lead, making it "Whiter" so Fuller paints are exceptionally clear-toned. All ingredients are thoroughly mixed in specially designed machines, so the paint is always uniform and smooth.

The result on the house is a beautiful, elastic, tough, protective coating that stays, if properly

applied, five or more years, keeping the wood like new.

Some people figure paint economy as "cost per gallon." That is wrong. For "cheap" paint doesn't cover so much surface—you buy more gallons. "Cheap" paint is harder to spread and you have more labor cost. So the "cheap" paint on the house costs just as much as the best of paint.

Don't allow surfaces to rot—it costs less to paint them.

"Cheap" paint on the average starts cracking in twelve months, while the best paint stays intact from five to ten times longer, if properly applied. Figure the cost per year of service and decide which paint you want to use.

We spend more to make paints for your economy. Be sure you get them when you paint.
