**Do You Buy a Motor Car "Sight Unseen?"**

You see the vital aspect of a car only by the way long, hard service affects it. Will it become loose and noisy? Grow wasteful of oil and fuel? Lose efficiency? Require replacements, frequent repairs and adjustments? Or will it remain free of these disabilities?

**THERE IS A SIMPLE WAY TO TELL.**

Not by a mere salesroom examination. That cannot show the differences which make some cars continue to serve reliably and economically for years. It cannot show superiorities of mechanical design, nor the painstaking workmanship on details that in all likelihood you will never see.

And even a demonstration tells nothing of how a car will wear in steady service. But it is easy to find and examine the real proofs. What have cars of the same make shown over a period of several years?

What is the future expectancy of good service from such cars after twenty or thirty thousand miles. You have the all-important advantage of being able to ask owners. Make use of it. Find out how the car you are thinking of buying has served other owners. Learn what mileage they get on gasoline, oil and tires. Is the second or the third 10,000 miles more costly than the first? Is it just as satisfactory in performance? Would that owner buy another car of the same make?

Of course there are basic reasons why Essex differs from other light cars—why owners compare it to costly cars.

And we will be glad of an early opportunity to explain the many points of advantage that costly cars share with Essex.
