**The Story of
Our States**

By JONATHAN BRACE
XV.—KENTUCKY

THE kinship of Kentucky and Virginia is that of parent and child. From Virginia came most of the settlers of the western state, and with them these pioneers brought Virginia institutions and ideals. It was not until 1776 that the first authentic journey was made by a white man into central parts of the region afterwards called Kentucky.

Further explorations showed that this territory held two important attractions for settlers. The first was the great fertility of what was called the Blue Grass region. The so-called blue grass, from which this state is nicknamed the "Blue Grass State" is in no wise peculiar to Kentucky.

The second inducement for settlers was the fact that there were no Indians living in this region. It was later found that many roving bands of savages crossed the Ohio from the north and sorely harassed the early colonists until Clark's expeditions into Ohio and Indiana checked their invasions. In fact, the name Kentucky is probably derived from the Iroquois word kentka-ke, meaning "hunting land." Another interpretation is "dark and bloody ground," but this is doubtless incorrect.

The main highways of travel at that time were Daniel Boone's "Wilderness Road" through Cumberland Gap and down the Ohio. Hardy pioneers poured into this new territory in such numbers that in 1792, with the permission of Virginia, Kentucky was admitted to the Union as the fifteenth state with an area of 40,598 square miles. Kentucky has thirteen electoral votes for president. The remarkable physical condition of its population is shown in a report of the volunteers in the Civil war. This gave their average height as nearly an inch taller than the New England troops and with a correspondingly greater girth of chest.
