Public Sets Wages

One thing has been clearly demonstrated during the past year.

Radical labor leaders can call strikes to enforce prohibitive wage and working conditions—but they cannot force industry to operate under such dictation and furnish employment.

The price of labor is set the same as automobiles, diamonds, butter or eggs.

Combinations to corner the market may hold for a short time but when they break the smash is worse than ever.

The buying power of the people sets all prices and the law of supply and demand operates in conjunction with the buying power.

Oregon National Guard

Oregon derived a net profit of \$119,077 in the operation of its National guard during the past year, according to an annual financial statement issued by Geo. A. White, adjutant general of the state. This was accomplished under the joint army partnership with the federal government through which the United States treasurer distributed in armory payrolls and camp pay among 2400 Oregonians located in twenty Oregon cities the sum of \$199,052.50, the total cost to state of administration and upkeep being \$79,975.

The past year's profit was nearly four times as much as was derived from the government's payrolls for 1920, due to the increase in the size of the state service and success in meeting all government requirements for pay of the Oregon citizen soldiers. In addition to the \$199,052 received in cash the state secured the award of federal property amounting to \$257,217.29.

After dinner the ladies repaired to the parlor and spent the remaining hours of the afternoon in visiting and doing fancy work. Besides the members present, there were five visitors. At five o'clock the company dispersed with an invitation from Mrs. Henry Githens to hold the next meeting at her home in Currinsville. At this meeting the annual election of officers will take place.
