Be Careful, Campers

According to records of the
Federal foresters on the 23,072,-
793 acres of national forest lands
in Washington and Oregon, 1206
forest fires occurred during the
year 1921. Of this number 469
fires, or 39 per cent were started
by lightning, which no man
could possibly prevent. The next
highest number was 434, or 36
percent of the total, and these
were due to careless, thought-
less or ignorant campers, mostly
our own people. Frank Branch
Riley is now preaching to the
East the gospel of the scenic
glory of the Northwest. The
Northwest is asking the world
to come and see, and come again,
but will blackened mountain-
sides and smoke-covered peaks
attract the world tourist? Eter-
nal watchfulness and thought-
fulness regarding the use of fire
in the forests are essential if we
may expect the tourist dollar to
roll northwestward.
