Very Interesting Indeed

There must be an interesting inside story as to why Oregon was selected at this time for the attempt of the Scottish Rite branch of the Masonic fraternity to initiate a compulsory school attendance law. It is impossible to believe that the movement had its entire inception and authorization locally. If not, has Oregon's reputation as a good field for politician experimentation and its receptiveness and responsiveness to new tendencies been responsible for its selection? Or is the movement to be explained by the fact that Oregon is reported to have become a thoroughly factionalized state along religious lines?—Oregon Voter.
