As their father W. E. Myers, is not yet recovered from the accident to his hand, they all three are now at home suffering from their injuries.

**The Story of
Our States**

By JONATHAN BRACE
XLII.—IDAHO

THE year 1880 saw the stars in our flag increase from thirty-eight to forty-two, for four states were added to the Union in that year. In 1890 two more states were admitted, the first of which was Idaho, so that during these two years the manufacturer must have been kept busy turning out new flags with the proper number of stars.

Idaho is very mountainous and the name is derived from the Shoshone Indian word meaning "gem of mountains."

The first white explorers were undoubtedly Lewis and Clark on their memorable trip in 1804-5.

Idaho was a part of Oregon territory, which was jointly occupied by British and Americans until the Treaty of 1846 definitely turned over to the United States the country south of the 49th parallel. In 1863 Idaho was organized as a territory, with an area three times the size of the present state, as it included Montana and part of Wyoming. The next year Montana was set off for a territory by itself, and in 1890 Wyoming was organized so that in 1890 when Idaho was admitted as the forty-third state of the Union, its area was reduced to 83,888 square miles. Even so it ranks as the eleventh state in size.

The rapid settlement of Idaho was due to the discovery of gold, the same cause which so rapidly built up the adjacent states. It was in 1882 that gold was found at Coeur d'Alene in the northern part of the state, and miners immediately flocked to the state in great numbers.

There was serious labor trouble in the Coeur d'Alene section in 1892 and again in 1899, when martial law was established until peace between the miners and mine owners was effected.

Idaho is fifth from the end in the list of states according to population, and accordingly has but four presidential electors. But the state is developing rapidly.
