BORN—Thursday evening, March 8, to Mr. and Mrs. Ray Holgate, a son, with Dr. Midford in attendance. The baby was born apparently dead, but the physician restored life by artificial respiration, and it lived eleven hours afterwards, death being caused by the bursting of a blood vessel in the head.

A. G. Ames and Marshal Henthorn were busy last Thursday in putting in a larger water supply pipe in the alley between the Sparks, Ames, Wagner and Gibbs residences. The old pipe was too small to furnish sufficient water for irrigating purposes in summer. When each had the hose running there was no pressure, so that it was impossible to water the gardens unless two waited till the others got through, which caused much inconvenience, especially when the hours were restricted. The men worked till half past one Friday morning in order to get through so that the water could be turned on again.

Washing eggs to be used for hatching purposes does not necessarily decrease hatchability, but increases evaporation because the pores are opened. Excess evaporation causes small chicks which do not hatch properly.

A Radio in the Home

A correspondent who lives on a farm in Minnesota, recently installed a radio outfit in his home, and this is what he writes concerning it:

"We can get Minneapolis any hour of the day or night, and every word comes louder and plainer than any telephone conversation you ever heard.

"Last night I brought in Fort Worth, Texas, and thought it was Minneapolis, it was so distinct. A man sang 'My Yaller Headed Gal,' and you could distinguish most every word. Besides Fort Worth, we brought in a concert from the Westinghouse Research Laboratory at Pittsburgh, Pa., conversation from Schenectady, N. Y., music from Atlanta, Ga., a concert from Memphis, Tenn., a detail description of a basketball game between Wisconsin and Northwestern University, piano duet from St. Louis, the State Prison band at Jefferson City, Mo., and Mrs. John Fisher singing at Denver, Colorado. This is just a sample evening program.

"Saturday night we listened to the Minneapolis Symphony orchestra, and during the intermission listened to Sousa's band broadcasting from Denver. Every Sunday Minneapolis broadcasts Presbyterian services at 11 a. m., and a week ago St. Paul's Episcopal vespers at 4:30 p. m., and Christian Science service in the evening.

"Last Sunday they broadcasted another symphony concert and received a telegram of appreciation from Salem, Oregon."

Senior Party

On March 9th the girls of Hustle Inn gave a party for the benefit of the Senior class chaperoned by Mr. and Mrs. Einarson. The evening was spent in playing many enjoyable games, some of them proving to be very amusing. Refreshments were served at 10:30 o'clock.

The house was decorated with the senior colors, purple and white. The hostesses for the occasion were the Misses Norma Randolph, Mae Smith, Melba Harmon and Constance Richmond.

Sunkist News

Escondido, California, March 10, 1923.

Mr. and Mrs. Upton H. Gibbs, Estacada, Oregon.

My Dear Gibbsses:

On Thursday the 8th, we had the surprise of our sweet life in California, when Mr. and Mrs. Harry Snyder and little son Brooks, and Mr. Earl Kilgore drove into our "auto" yard. To say we were glad and pleased would be putting it very mild, and in the short time that they were here stories of our old home up north, and of our new home here were passed swiftly, and we gave Snyder and Kilgore a message to you all at Estacada.

It was a perfect day and one they will remember for a long time, and in the near future we expect to see them on another trip, for in this "SUNKIST VALE" we have the cream of all the climates in the SUNNY SOUTH LAND. These men and Mrs. Snyder can tell all of our old friends just how we are located, and what kind of a home we have, and all we ask is, that you get, or give them a chance to tell you the story as it was told to them and as they saw the same.

Mrs. Weatherby has been ill since December 23, when she was taken with a very severe attack of acute indigestion and congestion of the liver and she has been a very sick woman, but thanks to good care and professional skill she is rapidly regaining her former good health. Mrs. Weatherby's rheumatism has left entirely and she does not suffer from the aches and pains as she did up north. You who are likewise afflicted should take the same remedy—the Sunkist, and very especially the Sunkist Vale.

We are now picking oranges and lemons and shipping them all over the U. S., and as our fruit is about the best it commands extra prices.

With best wishes and kindest regards to all, I am,

Very truly yours,
GEO. B. WEATHERBY.

Potato Blossom End Best

The blossom end cutting of potatoes proved satisfactory in most instances where tried last year and those farmers who saved the blossom end cuts for planting on disease free ground in most cases greatly reduced the amount of the wilt. It is believed that by following the Station method of examining the stem ends for wilt and saving the blossom ends for special seed patches and careful summer roguing that the wilt troubles may be to a considerable extent eliminated.—O. A. C. Exp. St.

Cultivation Saves Moisture

The fact that moisture can be conserved when summer arrives by a thorough working of the soil in the spring has been learned by the most successful vegetable growers of the state. A fine top surface of the garden makes it easier for the seeder to operate and produce a uniform germination and later an even stand of plants. A fine surface soil also acts as a good dry mulch and is valuable when fertilizer is broadcasted before seeding or transplanting. The successful growth of many vegetables such as cabbage, cauliflower, broccoli, and tomatoes can invariably be traced to the thorough spring preparation of the soil as an important factor.—O. A. C. Exp. station.

Christian Church

Bible School every Lord's Day at 10 a. m.; Preaching 11 a. m. A cordial invitation is extended to all. The theme at the morning service, March 18, will be "Life or Death, Which?" You are entitled to one of the two. Come out to church and see which one you want. The cost of each is about the same, but the reward is quite different.

"Uncle, I wish you'd let me have a tenner. I appeal to you as a close relative."

"You do, eh? Well, here's a dollar."

World's Tiniest Baby.

The tiniest baby in the world was born to a London woman a few weeks ago. She is a twin and weighed only one pound at birth. Her sister, weighing 3½ pounds, died. Mrs. Clarke, her grandmother, said: "I wrapped her in cotton-wool, covered her with a woolen shawl, and put her in a sewing machine box. Then I put in hot-water bottles and placed the box before the fire, which is kept going day and night." Only one other case of a one-pound baby who survived is on record.

Busy Blind Man Always Happy.

A man named Walters of Maryborough, Australia, has been blind since early childhood, and here's his record: Hospital president, town councillor for many years, member of water commission, conductor of Anglican choir, brilliant Shakespearean scholar, keen crib player, and the most cheerful person in the town.

Mammoth Pencil.

Possibly the biggest blacklead pencil ever made was that exhibited at Durham, England, some years ago. This mammoth pencil was 15 feet in length and 11 inches in circumference, whilst the diameter of the lead itself was an inch and a half. Its manufacturer sold it for \$1,250.

The Way It Ought to Be.

"We've got it on record, anyhow."
"What?"
"The Germans admit that we forced them to sign the peace treaty. That ought to end their boasts that they can't be beat."
