BOB
COOKE MOTOR COMPANY
ESTACADA, OREGON

Now we offer you 12 dividends every year!

THIS company now offers to its customers, patrons and the public what we believe to be one of the most attractive opportunities for putting their money to work at high wages in a great big local industry. For the first time in the history of the Northwest you are given a chance of earning regular and attractive dividends twelve times a year—one dividend day each month.

7.20 per cent in Oregon's Greatest Public Utility!

Briefly, these are the reasons for the attractiveness of this new 7.20 per cent accumulative First Preferred Stock:

- | | |
|--|---|
| 1—Your income will be regular and dependable. | 4—Dividends exempt from normal federal income tax |
| 2—Dividends paid by check on the first of each month or quarterly, as preferred. | 5—Your savings will be safe. |
| 3—Exempt from Oregon personal property tax. | 6—Business is firmly established, well managed and permanent. |
| | 7—To yield 7.20 per cent. Price \$100. |

If you desire to subscribe for shares on our easy payment plan you may pay \$10 per share down and \$10 a month per share until paid for. We will pay you 7 per cent interest on all your payments until the shares are yours and then your dividends begin to accrue immediately.

Act on this opportunity today. Inquire at our Investment Department, 820 Electric Building, now!

Portland Electric Power Company
Portland, Salem, Oregon City, and Vancouver, Wash.

N. OF W. INSTALL NEW OFFICERS

At the installation of the Neighbors of Woodcraft last Thursday evening, Jan. 15, the following officers were installed for the ensuing year; G. N. Lola Dodson; P. G. N., Louise Linn; Adv., Hattie Fuller; Mgrs., Margaret Moss, Violet Amacher, and Mrs. J. Norris; Clerk, Frances Gates; Banker, Ernest Amacher; Att., Violet Amacher; Mag. Mattie Cahill; C. of G., Sylvester E. Lawrence; F. B. Augustus Sagner; I. S. and O. S., Mr. Kendle; Cor., Evelyn Lawrence.

Grand Manager Mardall was the installing officer and did the installing in a most impressive manner after which the following program was enjoyed: Solo, Miss Kirschner; Dancing, Estelle Hansen; Reading, Mrs. Cahill; Trio, Mrs. Cahill, Mrs. Reagan and Mr. Cavanaugh; address on "Principles of Woodcraft" by Gr. Mgr. Mardall.

After the program, the Neighbors with the W. O. W. and their friends enjoyed cards and games until a delightful lunch was served in the dining hall during which several short and snappy talks were given. Gr. Mgr. Mardall created quite a bit of merriment when she said she was so glad the mayor had been called on for a speech because she did not know we had a mayor. Her comments on various ones present were highly enjoyed by all except perhaps her victims.

The next regular meeting of the N. O. W. will be held Thursday evening, Feb. 5 when three new members will be initiated.

Mrs. W. F. Cary and daughter were Portland visitors last Saturday.

Miss Kirschner had as her guests over the week-end her nieces, Maxine and Irene Weston of Portland and Miss Louise Schriber of Salem.

Growth of Jellyfish

The manner in which a jellyfish produces its "children" is really wonderful.

In most cases the beginning is an egg, which, lying on the bottom, produces a beautiful tree-like growth. The "tree" fastens itself to the bottom and brings forth buds which, when ripe, drop off and develop into jellyfish. The latter, in turn, lay eggs and the process is repeated, as told in London Tit-Bits.

Most of the very large species have a different way of reproducing themselves. The egg is set free in the water and develops into a pear-shaped larva, which for a while swims about rapidly, being provided with hair-like appendages that serve the purpose of ears. Then the larvae settles down, anchors itself to the bottom, increases in size rapidly and finally splits up into thin, flat discs which swim off and grow up into large jellyfishes.

Horses Repay Kindness

It is said the Arabs were the first to appreciate a horse's intelligence and to treat him accordingly. They kept the history of their horses written on tablets of ivory and traced their parentage back to the time of the pharaohs. They were extremely thoughtful of the comfort of the horse and it was even said they took better care of their horses than they did of their families. Constant companionship made the Arabian horse quick to understand the meaning of words, and kindness made them fearless, brave and obedient. The intelligence of the horse varies just as it does in other animals, or even people, and is developed or retarded according to man's treatment of him, says a bulletin of the American Society for the Prevention of Cruelty to Animals.

WANT AND FOR SALE ADS

An E. H. S. Lettermen's Club was formed last week. This is a club composed of all the lettermen in high school that have earned letter's in any sport. The purpose of the club is to discuss the pro and con of athletics and to talk over tactics used by big teams. The president elected was Harvey Woodworth. Other officers are vice-president, Frank Hayden, secretary, Glen Ely, treasurer, William Shearer, and Everett Osborne, sergeant-at-arms.

The Estacada High School boys defeated Canby in one of the fastest and closest games played on the Canby floor. The final score was 21 to 19. An extra five minute period had to be played to play off a 19 to 19 tie. Jennings for Estacada was high point man with 14 points while Woodworth was second with 6.

The Canby girls team showed what experience does in basketball and defeated the local girls 29 to 12. The Estacada girls were in the lead at the start of the game but the experience of the Canby girls counted in the second half.

Both girls and boys teams play Silverton at Silverton, Friday the 23rd.

The Estacada High school carnival took place Friday, Jan. 16. The large crowd which was present seemed to have a very enjoyable evening. Each booth was successfully run. About one hundred and seventy dollars in all was taken in. Expenses were about fifty dollars making one hundred and twenty dollars clear. This is very welcome to the studentbody which appreciates the public help. The Band in particular deserves thanks for helping out the school.

Last Wednesday, January 14th talks were given the student body by Mr. Vedder, County School Superintendent, H. C. Stephens, and Mr. Caufield. Mr. Vedder advised the students to make the best of their studies and continue their education after they are through high school. Mr. Stephens introduced Mr. Caufield of Oregon City who gave an interesting talk on the first need of money and on the beginning of banks. Several other talks on banking will be given by our local banker, H. C. Stephens during the next semester.

LOANS on farms 6 per cent. No commission. City Loans Monthly plan. Oregon City Abstract Co.

EVERY DAY

Horse Markets Coming Back

Horse markets are coming back. As both farm and city are demanding more and better horses, better prices may ultimately result, according to the Sears-Roebuck Agricultural Foundation based on a study of the trend in the buying power of farm horses during the past 57 years.

Low prices probably will continue to discourage horse and mule production and cause a falling off in the equine population until average prices return, the Foundation believes. But already horse breeding operations have begun to expand in the districts possessing the kind of foundation stock capable of producing the sort of horses the market wants. Attractive prices are now being paid for all good, big sound shapely drafters coming to market and good horses of the wagon type weighing 1,400 to 1,600 pounds. Prices have advanced from the extreme depression of two years ago.

How soon the turning point will be reached on the rank and file of horses is uncertain. Previous cycles of horse and mule prices as shown by the accompanying chart have varied greatly in length. The first lasted eleven years from depression to depression, the second eighteen years and the present cycle is already twenty-seven years. It seems logical to believe that an upward turn in prices which will last for a decade or longer will start before long and that good horses and mules produced from matings in the next few years will get the benefit of that advance by the time they reach marketable age. Good horses are the exception on farms today. It is unthinkable that good farmers will be content with plugs for long.
