Last Friday night the boys' team of the Estacada high school played the boys' team of Gresham high school in a snappy game of basketball on the home floor. Gresham won with a score of 15 to 11.

Another feature of the game was a candy sale put on by the girls for their rest room.

Next Friday, February 6, the girls will play the town team.

This game will precede the one between the De Molay team of Sunnyside and the boys' team.

A new class, Economics, has been substituted for Geom. II, which was discontinued last week. The Geometry class are the students of this class.

Crop rotation where otherwise practicable on Oregon farms helps to eradicate weeds, avoid insect pests and plant diseases, and reduce toxins. Other advantages listed by the experiment station are conservation of soil fertility through the different demands of root systems of different crops, and by allowing recuperation after crops that make heavy demands on the soil.
