CHEVROLET NEWS

In the spring an automobile owner's fancy turns to cleaning up the old bus. During the remainder of the year the color of the car may be unrecognizable but somehow the bright sunshine and the clean breezes form a kind of tonic that gets into an automobile owner's blood and urges him to clean up the car, if for no other reason than to be in harmony with the spirit of the season.

The results of such manual labor are often real gratifying; in fact, inspiring a kind of pride of ownership which may have palled during the year. But if the car chances to be a couple of years old there are some tell-tale marks that reveal age.

It was because of the fact that rain and sunshine will form rust on most metals that the engineers of the Chevrolet Motor Company set to work to find a type of metal that would not rust.

The results of their experiments along this line were embodied in the new Chevrolet--in an airplane metal radiator shell, which is non-rusting because of the composition of the metal used and has all the beauty of nickel. Like the Duo finish on this car, this radiator shell actually improves in luster with rubbing and age.

There is no possibility of rubbing through the coating because the shell is made of the same material.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions.

HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by druggists for over 40 Years. F. J. Cheney & Co., Toledo, Ohio.
