

Gentle Maiden Sees and Enjoys Football Game

Oh, that fullback got his face kicked in. Oh, how sweetly pretty! I just know he's happy. Now he can lie still in the hospital and read and hear the birdies sing and be glad, oh, so glad.

Oh, goody. Those two big Swedes are jumping up and down on the quarterback. Just like boys at play. How kind the Swedes look. And how happy the little quarterback must be that he can make them so glad. Oh, football is so lovely, so bloody lovely, reports Outing Magazine.

Oh, joy! No wonder the birdies sing and the flowers are gay. They have knocked the center cold. See, his left leg is broken, quite broken. And oh, rapture! I think his neck is hurt, too. How pleased all the others are. They are singing and cheering. They're so happy.

Oh, what a delightful picture! That big blond giant just kicked at the ball and missed it and his great foot landed in that other player's stomach, quite lost from sight. The hand plays. No wonder. There! He has got his foot out again. Now they can both be glad.

Likes and Dislikes for Various Kinds of Food

Many races, many foods, many fads. The luxury of one people is the bane of another. An attempt is being made to introduce snails as an article of food in certain London restaurants. The French, of course, regard snails as a delicacy, while Britishers almost shudder at the thought of eating them! Yet English folks eat mussels, whelks and winkles, which in some countries are regarded as being unfit for human consumption. In England the eel is relished by many people, but in Scotland it is detested by nearly everybody. Rabbits are looked upon as vermin in some parts of America and Australia and are seldom served at table. In Britain rabbit pie is a favorite dish. Swede turnips are often eaten in Scotland and Canada with other vegetables, whereas in some parts of England they are cordially disliked and given only to cattle. Turnip-tops in Scotland, again, are not considered worth cooking. But in Covent Garden they sell by the ton.—London Mail.

Honor in Installments

The officials of a certain church were anxious to obtain a "D. D." for their pastor, and a letter was sent to a certain "diploma mill" asking for terms. As the price mentioned for the honor was twice as great as the church was prepared to pay, another letter was forwarded to the authorities stating that they would purchase one "D." now and the other when they had sufficient funds for the purpose.

Young Ducklings Early at Home in the Water

The woodduck, unlike most other ducks, usually builds his nest far from his natural element, water, writes Ellis Gilmore MacLeod in St. Nicholas. But no sooner are the eggs hatched and the ducklings about the size of bumblebees, than each parent bird takes a little one in its bill, wriggles through the opening in the chestnut tree or white oak which harbors the nest, and, with a quick glance lest some enemy may lurk near, flies swiftly overland to creek or water hole. Here the two tiny burdens are dropped gently into the water.

Without previous swimming lessons, these newly hatched mites dart over the surface of the water for the cover of marsh grass or lily pad where they hide until the return of their parents with more of their brothers and sisters.

The flight of the old ducks continues back and forth from the home nest to the water until the family of from 12 to 18 are assembled, when, at a soft call-note from the parents, every little paddler darts from cover and starts chasing water spiders, as if that were an old game.

His Way Out of Dilemma

The commanding officer looked down the charge sheet to see what type of case he had to deal with that morning.

Suddenly he started. "Mutiny!" he muttered. "Private King charged with mutiny!" Then aloud: "Where is the corporal who made this arrest?"

"Here, sir," answered a corporal, stepping forward.

"Do you charge Private King with mutiny?" was the stern inquiry.

"I do, sir," was the reply.

"On what grounds?"

The corporal hesitated for a moment. Then:

"Well, sir," he said, confidentially, "It was really insubordination, but I didn't know how to spell that, so I put 'mutiny.'"

Heat Kills Germs

Radiant (or visible) heat was emphasized by Prof. Leonard Hill—at a recent meeting of the London Zoological society—as "most useful in helping caged animals to fight against infection" from tuberculosis. Hot-water pipes, he pointed out, though an economical way of raising temperature in the animal houses, do not provide all the benefits of radiant heat such as we know best in the form of sunlight and, in another form, in the domestic coal fire. In fact, central heating—excellent in its place—is not healthy heating, as the prevalence of tuberculosis in steam-heating countries such as Sweden, Russia and the United States goes far to prove.

Pretty Legend of Crosses

Near the place where the Blue Ridge and the Allegheny mountains unite there is, in Patrick county, Va., a spur of the Blue Ridge called "Bull mountain." On the side of this mountain, and nowhere else in the world, there are found the famous "fairly stones." The mountaineers explain it by legends worthy of the myth-making Greeks. One story says "that ages ago, when the red men were masters here, these stones were showered down by the Great Spirit as a sign of salvation coming to the savage race." But the generally accepted legend—that one from which the name comes—is this: "When Christ was crucified on Calvary elfin messengers carried the news to all parts of the world. When the tidings of woe reached the fairies in the rugged mountains they ceased their merrymaking and at once began to make these crosses as mementos of the sad event."

Peacock and Turkey

"Look at me," said the peacock, spreading his tail and strutting grandly about; "am I not handsome?"

"Yes," replied the turkey, "in your own eyes, but I put up a perpetual thanksgiving that I was not hatched so vain as you."

"I should think thanksgiving was rather a tender subject with you," rejoined the peacock, pluming himself.

"Not at all," said the farmer, who had been listening to this interchange of civilities; "he is a tender subject for 'Thanksgiving!' And so saying, he caught up the turkey and carried him off to market."

"Well, well," said the peacock, "I'm glad I'm too handsome to eat, and that fine feathers don't always make fine birds, according to the cook."—St. Nicholas Magazine.

Meant All She Said

They were evidently married and must have disagreed before they came to the lecture the other evening. For every once in a while she would deliver some cutting remark to him. But the best came when he shifted his chair so that it was directly in front of her. But he still tried to be polite. "Is it hard for you to look over my shoulder in public?" he asked.

"No," was the cutting answer, "not a bit harder than it is overlooking your faults in private."—Indianapolis News.

"Silver" Foxes

The name silver fox, as commonly used by furriers, includes the dark phases of the ordinary red fox, variously called silver gray, silver black, or black. The color of the red fox of the Northeastern states and of its allies of the colder part of North America varies from red to black, and these extremes with the gradations between them form four more or less distinct phases, known respectively as red, cross or patch, silver and black.

BARTON

Miss Grace Ferrel is spending a few days at home as she is not well.

Jessie Odell spent Sunday at her home. She is training for a nurse at Good Samaritan hospital.

Mrs. A. Warner was in Portland last Sunday, Monday and Tuesday visiting friends.

Mrs. Hoffman was a Portland visitor last Tuesday.

Stafford won the ball game from Barton Sunday, the score being 4 to 3. The dance to be given by the team has been postponed until April 25.

L. M. Peterson spent last week at Eugene. Gladys Nolan assisted Mrs. Peterson in the store during his absence.

Mrs. Maude Odell will be the hostess at the next meeting of the Good Will club. It meets this Thursday at her home.
