Nature takes care of the crop after the seed is planted.

But what good sunshine and rain can make of your crop depends upon the thorough seed bed preparation and proper planting which you have done.

Income Tax Has Never Had Great Popularity

Imaginative persons seem never to tire of conjecturing as to which of modern man's accomplishments would most astound our ancestors.

The motorcar or the airplane is usually the favorite, but if one could select a chosen few, comprising many of the kings of England along with their counselors, probably the achievement which would bulk largest in their eyes would be the collection of the income tax.

Starting with Edward III, who distinguished himself by collecting \$130,000 by a graduated capital levy in 1321 without causing a revolution, the history of the efforts of the rulers of our race to yoke us with this burden is interesting. Edward III's levy was very modest, says A. G. D. in the Winthrop Free Press. It ranged from \$30 to 8 cents, according to the position of the taxpayer.

Richard II—his ill-starred grandson—almost lost his throne before he had got firmly seated on it, because he levied a still more modest tax, ranging from \$5 to 8 cents. Wat Tyler, before he was murdered, so convinced the rulers of Britain that an income tax was not a practical form of taxation that it was more than 200 years before such a levy was again attempted.
