FORD CAR RUCKSTELL EQUIPPED, IS FIRST TO REACH GOVERNMENT CAMP

Portland, Oregon, May, 1925.

Ploughing and smashing its way through the smaller drifts and going over the top of the deep ones, a Ford Touring car, Ruckstell-equipped, reached Government Camp, on the south side of Mt. Hood on Saturday, May 9th, the first automobile to reach there this spring.

A party of four left Rhododendron Inn at 5:30 A. M. in a Ford car driven by H. R. Hopkins, assistant manager of the Francis Motor Car Company, Portland, Ford dealers, reaching the snow line at 6:00. From that time until 4:45 P. M. it was a continual battle of a man-made machine and man-made implements in the form of shovels, against the deep, wet snow. The sturdy little Ford, transmitting its power through the Ruckstell axle, and aided by the shovels and good wishes of the members of the party, bucked thru the last drift at 4:30. The tired shovellers climbed into the car and the 500 feet run to Government Camp Hotel was made over a cleared road, with the cutout open,

the horn blowing, and the entire party cheering.

Rr. and Mrs. R. L. Reese, caretakers of the hotel, officially greeted them as the first auto party to arrive in 1925.

Of course the trip would be incomplete without a visit to the pet bear. Bruin regarded the party with a suspicious eye and could hardly be convinced that a Ford car really had come through the drifts. It had been a long time since his rest had been disturbed by a motor car.

Sufficient time was spent at the hotel to view Mt. Hood, which from this point can hardly be recognized as the cone-shaped peak so familiar in pictures.

Mrs. H. H. Baisey of Tacoma, Washington, who has been visiting her mother, Mrs. John Irwin, returned to Portland, Tuesday morning to visit other relatives after which she will again return for a short visit with her mother.

RUPTURE EXPERT HERE

F. H. Seeley, of Chicago and Philadelphia, the noted truss expert, will personally be at the Electric Hotel, and will remain in Oregon City, Saturday only, June 13. Mr. Seeley says: "The Spermatic Shield will not only retain any case of rupture perfectly, but contracts the opening in 10 days on the average case. Being a vast advancement over all former methods—exemplifying instantaneous effects immediately appreciable and withstanding any strain or position no matter the size or location. Large or difficult cases, or incisional ruptures (following operations) specially solicited. This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions. Warning—All cases should be cautioned against the use of any elastic or web truss with understraps, as same rest where the lump is and not where the opening is, producing complications necessitating surgical operations. Mr. Seeley has documents from the United States Government, Washington, D. C., for inspection. He will be glad to demonstrate without charge or fit them if desired. Business demands prevent stopping at any other place in this section.

P. S.—Every statement in this notice has been verified before the Federal and State Courts.—F. H. Seeley.

When Better Automobiles Are Built, Buick Will Build Them

No. 15

Question: Why is a Buick so safe and so easy to steer?

Answer: Because of Buick's wonderful steering mechanism. It is the most expensive type now installed on any motor car—and worth the difference because it adds to Buick performance still another point of superiority.
