**OTHERS' RIGHTS**

**DID IT EVER OCCUR TO YOU:**

That the man or woman who, though being on the wrong side of the walk, ran into you and disturbed your equilibrium, was always demanding an apology from you for being where you had a right to be?

That courtesy is no more nor less than respect for other people's rights to do things that you claim are your rights?

That respect for other people's rights denotes good breeding?

That an apology for a breach of good manners is many times tendered as a mere expedient?

That this and more is contained in the few words, "Do unto others as you would have them do unto you?"

That this should be taught in our public and other schools, so that rising generations may materially assist in making the world a better place to live in?

That the generation now in the harness have defective memories, if they ever were able to mumble this rule?

That our courts should compel those who come before them, in whatsoever capacity, to observe this rule under such terms and conditions as would make impossible future backsliding on the part of the offender?

**LINCOLN**

None of us can think of Abraham Lincoln without thinking somewhat of self—he was that human. Even the sweep of greatness, bearing him so swiftly to the heights, seems not to have made him remote, but almost to bring him more near. In this compare him with Washington, a figure as distant from the day's round as those of ancient or even mythical times. Despite his warrant to the name, who could call him Gentleman George? Yet none hails at Honest Abe!

He was honest and plain and simple, and he kept these qualities beyond his earlier years in a way found only in the truly great, and seldom so emphasized in that small company. He was, perhaps, the most human and unaffected of the titans, those supreme achievers who cannot be accounted for by any of the formulae we know. Certainly no other American approaches him in the matter of genuineness, and our knowledge of the dominant personalities of the past leaves him as lonely in this as he was in his strange life.

He is a vast heritage for his own land, and for all lands, and no one doubts that time will strengthen his hold on men whose outer differences might seem to shatter hope of such sharing. But he had so little to do with outer things; he was so free from pretense and false pride and selfishness, and so familiar with sorrow, that these hindrances and this help to expression of certain dreams latent in all hearts have made his heart an open door to a common room for human hopes.
