IRRIGATES STRAWBERRIES
E. T. Bateson had just finished picking a dozen boxes of Everbearing strawberries when the writer happened to call at his home last Friday in the Viola vicinity. Mr. Bateson has a one acre garden tract, well drained and adapted to garden truck and berries. It is a square patch, and there are 11 rows of berries from which he picked 100 crates the first part of the season, and has been able to pick over the patch several times since and get all the berries needed by the family and some to can. Strawberry shortcake and strawberries and cream are common dishes at the Bateson home even up into the last days of September. After all, we found that his good luck is due to an irrigating system. This entire garden spot is irrigated during the summer.—E. M. Golder in Banner-Courier.

Phone Pests in Mexico
Parrots and monkeys are causing the telephone company in parts of Mexico great trouble and expense. After dark large numbers of these tree dwellers appropriate the wires that traverse the thinly settled parts of the country and play on them to such an extent that the service is badly crippled at times. Their weight has caused some lines to snap, with the result that miles of heavier wire have had to be strung.

COUNTY AGENT NOTES
County Agent Holt is preparing to send in this week an order for a carload of pyrotol, the explosive furnished by the government at a very cheap price, and which has done all that any powder can do at much less expense. He needs a few more orders to fill in the carload.

Mr. Holt has already shipped in this year three carloads of state lime, one going to Eagle Creek, which was all ordered by Mrs. Vernie Serranus to be placed upon acreage on the Earl Crest stock farm. The plan is to prepare a large amount of land for alfalfa.

The price for this lime, which comes from the state penitentiary, is \$6.50 a ton delivered to most points in Clackamas county. Up to date this year 117 tons of lime has been ordered.
