The Opportunity of a Lifetime

What would you give, Mr. Farmer, to have set before you for inspection and study the very finest and best bred livestock in all America? A year of your life or ten acres of your best land, wouldn't you? The lesson learned would be worth it.

Yet, you can have that opportunity without the sacrifice. At Portland, October 30-November 6, the 16th Annual Pacific International Livestock Exposition will exhibit the largest and greatest assemblage of livestock ever shown under one roof or at one time in the land. Dairy and Beef Cattle, Horses, Hogs, Sheep, Goats, competing for the largest premium list ever published—\$100,000. Also you will see the great fox exhibits. There will be the world-famous Horse Show, too, and a Land, Industrial and Dairy Products Exposition.

This bank deems the Pacific International an opportunity of a lifetime for every farmer in this vicinity, and we say: GO!

Mexican laws in regard to the rights of private property are the same as in this country, and the government may not confiscate without paying for the same. In the present religious controversy down there this fact has been made to appear otherwise by certain of the U. S. newspapers.

Senator Reed of Missouri has expressed the desire to retire from the senate and get himself a home with a back yard, where he can have a dog. If he has the thought in his head that the back yard of the White House is what he expects he should be warned not to give up his present job nor buy a dog.

Henry Ford announces a five-day week for his 217,000 employees with no wage reduction, virtually giving them one full day with pay. A very handsome thing to do, and it might be hoped his men would appreciate it enough to make good use of the time and not as an occasion for getting across into Canada after booze.

The movie actress who married Jack Dempsey because he carried the title of champion slugger is now sad and downcast. The usual result may now be looked for in a short time.

Society circles are all agog over the coming visit of Queen Marie of Rumania. Aside from her wearing a regal crown, she is a very estimable English-speaking lady, a first cousin of King George and a granddaughter of the late Queen Victoria. She is of some importance, evidently, as she will be the guest of the government while here and most of her appearances will be only in a public capacity.

Another skull has been dug up in Java which the diggers seem to think is the missing link between man and the ape. Some day they are going to prove this thing on themselves, and they'll be sorry for it.

Two prisoners, a man and a woman, were taken from jail at their request in a Washington city last week, joined in holy wedlock by a justice, and then returned to confinement. Nice thing to remember in after years by their children—if they have any.

Religious foreign missions are reporting a falling off in the support formerly extended them. Especially is this voiced by Methodists missionaries in India where many have been forced home by lack of funds. This may be accounted for in part by deflection of many to other religious beliefs which enter into such work, by lack of interest and the general use of the automobile which fills no churches.

Shrieking locomotive whistles which have heretofore been the terror of small children, the cause for old Dobbin to break and run and gave old maids the fidgets, are to be replaced on the Milwaukee road by a chime whistle that will woo a babe to sleep and yet be heard as far as the old kind.

Millions of dollars will pour into the coffers of motion picture photographers for pictures of the Florida disaster. Thus something that brought death and destruction to many and a world catastrophe, puts sordid wealth into the pockets of others.

Down in Tennessee they have voted on the question of evolution and the majority say it is no good. But the majority are not always right. It simply records an opinion. A majority might vote the earth flat, but that would not make it so.

The airplane was successfully used the past season in the Imperial Valley to combat the cantaloupe midew. The planes scattered poison dust over the fields, flying at the rate of 100 miles per hour.

Law officials say women criminals are increasing. They are active as bootleggers, narcotic peddlers and as members of holdup gangs. The great variety of roles a female may adopt in bobbed hair and male attire and changing back, will suggest how difficult it is to intercept her in all her operations.

OREGON'S NEED IS AN OREGON SENATOR

Every western state has a bi-partisan congressional delegation or else a rabid progressive in its representation except Oregon—This state has been considered safely republican and not necessary to be appeased by legislation and appropriations.

THAT'S WHY OREGON HAS BEEN IGNORED

motor car Performance

that startled the motor car industry

THE motor car industry was startled when Buick presented the new Buick with an engine vibrationless beyond belief.

If you have driven this great new car, with this remarkable engine, you know why.

Its fluid smoothness makes other motor cars seem rough, harsh, noisy.

People who have driven Buicks for years and people who have owned much more expensive cars, are captivated by the luxury of this one.
