DIXIE COW BREAKS ALL RECORDS

Red Lady is Record Breaker.

Red Lady, a pure-bred Jersey cow, has just completed the highest dairy record ever made by any cow south of the Mason and Dixon line. This cow yielded 1,028.51 lbs of butterfat and 19,008 lbs of milk in an official 365-day test. This great record follows one in which Red Lady produced 860.24 lbs. of butterfat and 17,195 lbs. of milk in 365 days.

MARKET NEWS OF THE WEEK—REVIEWED

The wheat market continues quite strong. The condition of the new crop, in many sections indicates a decrease in expected yield, has resulted in a stiffening of prices. A big decrease in wheat acreage in Canada is reported. The Kansas crop is expected to fall below that of 1926, the report being made that the Hessian fly is doing much damage and the fields are very spotted.

Potatoes continue to bring good prices, the eastern markets being very strong. Indicating the condition: "Rapidly diminishing stocks of old potatoes; flood damage to early potatoes in the Mississippi valley and lighter shipments from Texas are reported causes for recent sharp advance in the potato market."

Statistical Bulletin No. 17, issued by the U. S. department of agriculture for March, gives the prices received by producers of farm crops for each month in the years 1908 to 1925 inclusive in the states of Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Oregon, Washington and California, and copies of the bulletin may be obtained from the superintendent of documents, government printing office, Washington, D. C., at 25 cents a copy. It contains 152 pages of valuable reference figures.

The meeting of fruit growers and packers scheduled for May 31st at Corvallis promises to be very important, with a full attendance of representatives from the several prune sections of Oregon and Washington.

An editorial in the Portland Oregonian of May 18 takes note of the conditions which govern present day buying for family use and suggests that apple growers could increase the consumption of their fruit by packing it in five and ten pound boxes, as well as in 50-pound boxes. The thought is worth considering.

The livestock market in Portland yesterday showed some reduction in prices and in demand. Hogs suffered a decline of 15 to 25 cents a hundred; sheep also were a little lower and the movement in cattle was slow. The market in this case being affected somewhat by the arrival of four carloads from California. The coming of quite a lot of California grass cattle is causing much speculation as to the effect of that influx on the future markets.

POULTRY

CULLING YOUNG CHICKEN FLOCK

In purchasing baby chicks it is well to order a good many more than you have any intention of carrying through the whole season. During summer, chicks grow rapidly and at little cost, and there is a ready sale for them at the weight of two to two and a half pounds.

When the cockerels reach a weight of two pounds it is ordinarily considered that it is time to sell them. Any additional weight which they put on costs more. Furthermore, the market for them declines after early summer so that the longer you keep them the less they are worth per pound.

After the flock of chicks is a few weeks old you can tell if there are three or four of them not worth keeping. Look them over and if there are a few "crows" which very evidently can never amount to anything, get them out of the way. By remaining in the flock half sick and half well they may infect a large number of others and do a great deal of harm.

Make it a practice to look over the flock every few days until you are acquainted with the chicks and can tell which ones are growing best, so that you can decide which ones you want to save for next winter's laying flock.

Early in the summer, at least by the time the flock averages two pounds, separate the cockerels and the pullets, and then either send the cockerels to market or cull them.

Then go through the pullet flock and divide them into two lots. Those that are distinctly inferior ought to go along with the cockerels, and those that are fine and grow up and show quality can then receive the best of attention and feed so that they will grow every hour of the day toward full maturity, and be ready to lay plenty of eggs by the time snow flies.

Poor Economy to Cease Feeding Mash in Summer

"It is poor economy to quit feeding mash to the hens in summer," says Prof. C. W. Carrick of Purdue university. "Such a practice is likely to throw the whole flock into a molt and cause egg production to stop."

Many people have a notion that hens can pick up enough bugs and worms from the range during the summer to supply their needs. Records from farm poultry flocks have shown, however, that the range cannot be depended upon to supply sufficient feed for a satisfactory egg production.

One of the principle necessities for high egg production is protein in the ration. This can be supplied satisfactorily by feeding a suitable mash. The grain supplies some protein but it is not of suitable quality or sufficient quantity to give a high summer egg yield. When animal feeds such as meat scraps, tallow and milk are included with the mash, minerals as well as proteins are provided. These minerals are essential for egg production and are not supplied adequately in grains and grain products.

Determine Exactly How Many Eggs Each Hen Lays

A good trap nest provides the one accurate method of determining exactly how many eggs a hen has laid in one year. There is no short cut or easy way to figure from part of a year's trap-nest record what the total for the year will be, nor to cull carefully enough to estimate what it has been or will be.

The highest type of breeding for egg production may be secured only by trap-nesting every breeder throughout every day of her first laying year, and every day throughout the breeding season, as long as she is kept. In addition, both male and female birds must be selected which have the ability to transmit high production to their offspring.

The best poultry breeders are searching for the pullet that lays not only during the spring, but is also an early maturer and heavy winter layer, as well as a persistent summer layer. These characteristics coupled with intensity of production are found only in the best hens.

Lice and Worms

For a dip to rid a flock of lice, use one ounce of sodium fluoride to each gallon of water and mix the solution in a large washtub or barrel. Use one pound for about three hundred fowls. Hold the hens by the legs and wings to prevent struggling. Put them in the solution, tall first, to force the water underneath the feathers. Repeat this three or four times, and in very heavy-feathered hens it may be necessary to use the fingers to work the solution into the feathers.

Height of Roosts

The heavier breeds should have their roosts near the floor, and all on a level so there will be no crowding for highest places. Where heavy fowls have to fly down from high perches they are likely to contract hump-foot from bruises. Everything should be kept clean and fresh, and with good ventilation, free from draughts. Keep a lookout for water-eyes and running nostrils, a sneeze or cough. Little things taken in time will usually prevent ailments.

LEGAL NOTICES

SUMMONS

IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR CLACKAMAS COUNTY

C. E. RAMSBY Plaintiff) -VS-) R. G. MOORE, also all other persons or parties unknown claiming any right, title, estate, lien or interest in the real estate described in the complaint herein.) Defendants)

To R. G. MOORE: IN THE NAME OF THE STATE OF OREGON; You are hereby required to appear and answer the complaint of the plaintiff filed against you in the above entitled suit on or before the 26 day of May, 1927 A. D., said date being six weeks from the date of the first publication of the summons herein, and if you so fail to appear and answer for failure thereof the plaintiff will apply to the Court for the relief prayed for in the complaint herein, namely:—

(1) That the defendants may be required to set forth the nature of their claims; and that all adverse claims of the defendants may be determined by a decree of this Court. (2) That by said decree it be declared and adjudged that the defendants have no estate or interest whatever in or to the said lands and premises or any part or parcel thereof; and that the title of the plaintiff is good and valid. (3) That the defendants be forever enjoined and debarred from asserting any claim whatever in or to the said lands and premises adverse to the plaintiff, and for such other and further relief as this Honorable Court may deem just and equitable in the premises.

Said lands and premises are situated and lying in Clackamas County, State of Oregon, bounded and described as follows to wit:— Lots Seven (7) Eight (8) Nine (9) and Ten (10) in Block Thirty-nine (39) B. of Subdivision of Blocks 19, 28, 29, 30, 38, and 39 of Clackamas Heights.

This summons is served upon you pursuant to an order of the Honorable J. U. Campbell, Judge of the above entitled Court, which order was made and entered on the 1st day of Feb. 1927 A. D., said Order directed that you be served by publication of the summons herein for a period of six successive and consecutive weeks in the Eastern Clackamas News, a news paper of general circulation printed and published in Clackamas County, State of Oregon.

Date of first publication, April 14, 1927. Date of last publication, May 26, 1927.

Harry Frazer, Attorney for plaintiff. Address Mollala, Oregon.

NOTICE FOR PUBLICATION

DEPARTMENT OF THE INTERIOR U. S. Land Office at Portland, Oregon, May 2, 1927.

Notice is hereby given that William Winters, of Route 1, Estacada, Oregon, who, on April 9, 1924, made Homestead Entry No. 07580, on SW 1/4 SE 1/4, Section 19, Township 3 S., Range 5 E., Willamette Meridian, has filed notice of intention to make Final Proof, to establish claim to the land above described, before the Register U. S. Land Office, at Portland, Oregon, on the 14th day of June, 1927.

Claimant names as witnesses: Leo Rath, of Route 1, Estacada, Oregon; John Dew, of Route 1, Estacada, Oregon; Ed. Harders, of Route 1, Estacada, Oregon; Nick Rath, of Route 1, Estacada, Oregon.

Eggs rank high in digestibility—whether you eat them raw or cooked. The advantage is probably on the side of the slightly cooked egg—especially in the case of the egg white.

LEGAL NOTICES

NOTICE TO CREDITORS

In the County Court of the State of Oregon for the County of Clackamas.

In the Matter of the Estate of Robert W. Akins, Deceased. Notice is hereby given that the undersigned has been appointed by order of the above entitled court, duly made, Administrator of the estate of Robert W. Akins, deceased. All persons having claims against said estate are hereby notified to present them to the undersigned at the office of H. E. Cross, my Attorney, in Oregon City, Oregon, within six months from the date of this notice.

ARCHIE HOWELL Administrator

BIDS WANTED

Sealed bids will be received by the undersigned, clerk of Three Links School District No. 123, up to the 6th day of June, 1927, for furnishing material and building one school house for said district.

Plans and specifications will be on file at the Estacada State Bank at Estacada, Oregon. Each bid must be accompanied by a certified check in the amount of 5% of the bid.

All freight must be paid to Cazadero by the contractor, delivered to Three Links free. Catapillar will be furnished by contract, driver furnished by Schoolboard but paid by contractor.

The Board reserves the right to reject any or all bids.

Mrs. Ray Schaefer Three Links, Estacada, Oregon Clerk of District No. 123

ARTISAN CARD PARTY

The United Artisans will hold their regular monthly card party on next Wednesday evening, June 1. Everyone is welcome. A good time for all.

CURRINSVILLE

Mrs. J. H. Kitching is very low at this writing.

Dr. and Mrs. Harley Beals of Independence are visiting at the home of Mrs. Beal's parents, Mr. and Mrs. J. H. Kitching.

Message comes from the nurse of Cecil Wright on Wednesday that he sleeps fine and is slowly improving.

The continued rains are hurting the grain. Some corn has rotted in the ground and will have to be planted over again. Those who are done planting are asked to keep their seed corn for those who have lost theirs.

All of the Currinsville pupils passed this year. Those graduating from the eighth grade are George Allen, Jimmy Heiple, Clarence Kitching and Nell Linn.

Miss Poole, who has been teaching here for the past two years, has accepted a position in the Estacada school for the coming school year.

The local grade school will have a big baseball game Saturday afternoon with the Eagle Creek grade school at the May picnic.

Miss Gardner and Miss Poole were dinner guests of Mr. and Mrs. P. W. Douglass last Wednesday.
