THURSDAY, SEPTEMBER 8, 1927

The nice thing about being a man is you don't have to stay home after you wash your head.

It may be that the mills of the gods grind slowly because they get paid for overtime.

An eye-specialist says green quiets the nerves. This is especially true of green backs.

Although spring and fall are the favorite seasons for outside painting, it may be done in either summer or winter if necessary. Outside painting can be done whenever the surfaces are dry and the weather not damp, frosty, or freezing, and the temperature preferably between 60 and 80 degrees F. New wooden buildings need a priming coat of paint as soon as the weather permits, finishing coats being added within the next month or two. Tinned roofing should be painted as soon as laid, while galvanized sheet iron may be allowed to weather for a year, usually with no injurious effects, to give paint a better foot hold.

The dry cow about to freshen should be fed a laxative ration, wheat bran and linseed-oil meal being de-

sirable in the grain ration, and corn silage and legume hay for roughages. The ration should not contain too much roughage feeds at this time.

State highway departments last year surfaced a total of more than 13,600 miles of earth roads. In addition, they rebuilt 5, 828 miles of old surfaces, 163,059 miles of the 287,928 miles of Federal aid State roads are now surfaced.

Rubber hoof pads are not recommended for horses that work on the farm, as the soil works its way under the pad, causing lameness by extra pressure on the navicular joint. When rubber pads are used, the Bureau of Animal Industry advises that pine tar with a thin layer of oakum should be applied to the sole of the foot to keep it moist and avoid contraction.

The manner in which the average hen molts or sheds her feathers is a reasonably safe guide to follow in weeding out poor layers. The better producers continue to lay late in the fall and therefore do not molt until late. The late layers also molt late as a rule, while the early molters, which

are usually the poor layers, molt slowly. Hens that have not molted by August or September will show dirty worn out broken plumage, while those that have molted early will show fresh, clean plumage or growing feathers at this time.

Lightning conductors should be attached direct to a building with metallic fasteners. Porcelain insulators are not required. A good electrical connection with the wet roof and the walls of a building, says the weather Bureau, helps to relieve the structure of its charge. When a conductor of sufficient weight per foot is used (the

minimum is three ounces of copper conductor), there is no danger of the building being fired, even when a direct stroke of lightning is passing through the conductors.

CURRINSVILLE

The rains of the last few days have already started the grass to growing and is quite a blessing to the late potato grower.

The John Richard family are on their vacation this week.

Cleve Heiple has done a lot of repair work on the school building, and it is now ready for the school term.

George Kitching is moving to Estacada this week.

H. D. Lombard is moving in the house vacated by Geo. Kitching.

Ivor Hagen has been doing a lot of painting for the Currinsville store last week which adds to its appearance.

Ruth Hale is on her vacation.

The Earl McConnell family are away for a few days.

Mr. W. H. Wade was visiting his son Wilbur Tuesday.

Ivor Hagen made a trip to Portland Tuesday with Lloyd Ewalt.

Cecil Wright has been sick for several days.

Don Matson was calling on Geo. Welter and Victor Leon Tuesday.

Mr. and Mrs. Frank Halferty and children from Madras, Ore. arrived Tuesday evening at the home of Mrs. Halferty's parents, Mr. and Mrs. Wilbur Wade, for a few days visit. They expect to locate here if possible near school.

Mr. Tracy was visiting at his sisters, Mrs. Edgar Heiple, Tuesday.

Mr. and Mrs. Hoffmeister and children were shopping in Currinsville Tuesday.

VIOLA NEWS

The Viola School Fall Term will commence on Monday the 12th of September with Miss Rosie Trachal as teacher.

Mr. and Mrs. Charlie Hicinbo and two children spent Sunday at the Services' home.

Mr. and Mrs. John Mattax are moving into their new home this week.

Mr. and Mrs. Andrew Graham Jr. moved into their new house on Saturday and in the evening 25 of their friends and neighbors called on them and spent a very pleasant evening.

Mr. and Mrs. Frank Mattoon and daughter Esther, of Oregon City, called at the home of their parents Mr. and Mrs. Wm. Mattoon Monday.

A man and his wife and baby have moved in back of the Mattoon store. The man will be boss of the woods at the Elliot Sawmill.

Wm. Heinbuthom and wife and their two daughters, Mildred and Egther, from Stevenson, Washington spent Friday at his brother Charles' home at River Mill and spent Saturday and Sunday at the home of their parents, Mr. and Sevier.

Mrs. Leo Allen of Stevenson and Miss Benlah Hienbothom of Portland called at the Sevier home Sunday afternoon.

Mrs. Norma Randolph, who has been spending her vacation at the home of her parents, Mr. and Mrs. John Randolph, will leave for school on Wednesday. She goes to Lake View. Her brother Bruce will accompany her there. Her many friends wish her success and good luck.

Although steel and rubber enter largely into the manufacture of automobiles, there is more wood used in this industry than was ever used in the old horse vehicle business.

Cattle should not be fed within 24 hours before slaughter, but access to fresh water is desirable. Do not kill the animals while in an excited or overheated condition, as they will not bleed well. Beef from animals not properly bled does not keep well.

Grain should be fed to high-producing cows under all pasture conditions.

"In hog rearing it is not so much the kind of pasture as it is the necessity of having a good pasture of some kind."—E. Z. Rusgell.

With the approach of hunting season, the Biological Survey of the United States Department of Agriculture directs attention to the fact that under the migratory bird treaty act regulations, administered by the bureau, the only shore birds that can lawfully be hunted are Wilson snipe, or jacksnipe or woodcock. The Federal season has been closed for an indefinite period on black-bellied and golden plovers and until August 16, 1929, on greater and lesser yellow-legs. There is no open season on reedbirds. A copy of the Federal game laws and also a bulletin containing a synopsis of the Federal, State, and Provincial laws relating to the protection of game will be furnished free on request addressed to the United States Department of Agriculture, Washington, D. C.

In a recent questionnaire on the meat buying habits of American housewives, approximately 50 percent of those questioned believed that the butchers they patronized either handled the very best or a very good quality of meat. Commenting on this opinion, economists of the United States Department of Agriculture point out that only 9 per cent of the beef animals slaughtered at the Chicago market in 1924 were graded as prime or choice and suggest that "the lack of consumer knowledge of meat grades and quality was evident."

Profits In Trees

"Why should farmers plant trees?" is asked and answered by Alfred B. Hastings of the forest service, United States Department of Agriculture.

Trees set idle acres, too rough or too sterile for planting, to work growing and always marketable crop. Though trees take a number of years to reach maturity, a young plantation adds cash value to a farm, just as a young orchard does. In a few years it yields small material in the form of thinnings, such as poles and fence posts; later fuel and pulp wood; and finally tie and saw timber. It is a savings bank that pays compound interest. Timber growing is a necessary part of diversified farming, affording employment and wages for winter work. A farm wood lot is security to the banker and the farm loan board.

September 12th will be the opening day of school in Estacada and everything is being put in shape at the school buildings to receive the children on that day. A bus line has been arranged to pick up the high school students outside of Estacada and will make the following places: Barton, Carver, Logan, top of Springwater hill and return. This is a fine thing for this section of the country and will give the young people a fine chance to attend the high school here. William Buell, principal, along with the School Board are making all the necessary arrangements to make this school year a success.

Celery for soup should be chopped or cut very fine to give the juices a chance to mix with the other soup flavors.

THE MODERN KITCHEN

Electricity * the silent servant * works efficiently, tirelessly, hours with out end, uncomplainingly * in the modern kitchen.

It relieves the home-maker of the continuous attention to detail that has made housekeeping of other years a round of ceaseless drudgery * uninteresting routine.

Electric ranges, refrigerators and other appliances help you to realize those happy dreams of home-making * when execution of ideas seemed as simple as their planning.

Electric refrigerators keep foods sweet and fresh for days. The dry cold makes it possible to have foods of practically all kinds in the same compartment without interchange of flavors. They insure a continuous supply of ice cubes and make new frozen or chilled desserts and salads simple to serve. Economical * efficient * convenient.

Electric ranges cook foods more thoroughly * show less shrinkage in meats * fuller flavor in vegetables. They keep your kitchen clean and sweet. With the automatic time and temperature control they cook for you even when you are miles away, and without your supervision have dinner ready and hot when you return.

Electric Refrigerators and Ranges of all the best standard makes installed in your home on convenient terms. May we show them to you?
