THE MODERN KITCHEN

Electricity * the silent servant * works efficiently, tirelessly, hours with out end, uncomplainingly * in the modern kitchen.

It relieves the home-maker of the continuous attention to detail that has made housekeeping of other years a round of ceaseless drudgery * uninteresting routine.

Electric ranges, refrigerators and other appliances help you to realize those happy dreams of home-making * when execution of ideas seemed as simple as their planning.

Electric refrigerators keep foods sweet and fresh for days. The dry cold makes it possible to have foods of practically all kinds in the same compartment without interchange of flavors. They insure a continuous supply of ice cubes and make new frozen or chilled desserts and salads simple to serve. Economical * efficient * convenient.

Electric ranges cook foods more thoroughly * show less shrinkage in meats * fuller flavor in vegetables. They keep your kitchen clean and sweet. With the automatic time and temperature control they cook for you even when you are miles away, and without your supervision have dinner ready and hot when you return.

Electric Refrigerators and Ranges of all the best standard makes installed in your home on convenient terms. May we show them to you?
