Start Your Boy Right...

It is the early impressions that often count most in the future of a boy's life. Start yours right. Open a small savings account for him and teach him the usefulness of a bank, and the value to him in after life of knowing how to transact business as a banker does.

If you start a small account now it will be easier to send him through college or start him out in business. A few dollars a month from childhood will mean a lot when he is twenty-one. If you have a boy, start his account now—and keep it growing.

A Big Statement!

Our bank is prepared to render some service to everybody. No matter who you are, we can help you if given the chance. That is a big statement, but it is true.

Some people have the mistaken idea that a bank is only for rich people. Really the size of your bank account is not so important to us. We want your account, large or small, and know we can be of service to you. We have helped many people who had no bank account at all, in fact helped them make a bank account.
