PROTECTION FOR FARM PRODUCTS IS VITAL ISSUE

Republican Text Book Points Out How Tariff Has Helped Nation's Agriculture.

REVIEWS HOOVER FARM PLAN

First Section of New Campaign Document Deals With Basic Farm Problems.

WASHINGTON — The American farmer under Republican administration has had practically a monopoly of his home market. In this protected market, he disposes of 95 per cent of his products at prices higher than are paid elsewhere in the world for like products. This is pointed out in the Republican campaign textbook.

The complete book is being printed in installments of which the first is devoted entirely to agriculture, and includes pertinent extracts from Herbert Hoover's acceptance address, the agricultural plank of the Kansas City platform and other pertinent data relative to the farm situation.

In addition to this, there is a recital of the Republican party's constructive legislation in behalf of agriculture since 1920, a provision intended to show that the promises now being made to the farmers by Mr. Hoover and Senator Curtis spring from a sympathetic attitude and therefore will be fulfilled in good faith by the Republicans.

The problems of agriculture are treated from an economic rather than a political viewpoint, and emphasis is laid on the freedom from economic fallacies of the agricultural legislation already passed by Republican congresses which includes 24 measures since March, 1921.

"Republican legislation in behalf of agricultural producers has been formulated with a view of its having permanent value and being founded in sound political economy and good sense," says the textbook. "The control of every Republican Congress has been in the hands of those representing agricultural constituencies. So it has been logical and inevitable that the interests of agriculture have been conserved by the Republican party."

Loan Banks Aid Farmers

Since 1921 there has been made available to agricultural borrowers under Republican administrations a total of \$2,774,198,040, chiefly through the federal farm loan banks, the joint stock land banks, the intermediate credit banks and the war finance corporation. This recapitulation does not take into account such organizations as the Agricultural Credit Corporation, organized in 1924 to relieve an agricultural crisis in the northwest, nor the development of federal warehousing as an aid to marketing under the amended Federal Warehousing Act.

In the same period, under a Republican tariff which protects more agricultural products than any in history, the farm price of wheat has increased 20 per cent; rye, 20 per cent; corn, 70 per cent; oats, 30 per cent; barley, 60 per cent; flaxseed, 27 per cent; beef cattle, 80 per cent; calves, 50 per cent; butter, 15 per cent; hogs, 25 per cent; sheep, 80 per cent; lambs, 72 1/2 per cent; wool, 100 per cent.

The fallacy of arbitrary methods for lessening the spread between the producer and the ultimate consumer, such as are advocated by the 1928 Democratic platform, is pointed. They would necessarily result in price-fixing, and inevitably the 89,000,000 non-agricultural consumers would be fixing the price they desired to pay the 25,000,000 agricultural producers.

"Such a proposal is abhorrent to the spirit of American institutions," says the textbook. "It is the very essence of state socialism in that it would completely eliminate the element of individual initiative and enterprise with their commensurate individual reward."

Mr. Hoover's suggestions for the improvement of the farm situation are reviewed, particularly the emphasis he has laid upon the need for development of the home market, rather than experimental attempts to increase shipments of our agricultural products to foreign countries.

Led Hoover "Gang"

Benjamin Schooley, of Lawrence, Kan., was stunt leader of Hoover's boyhood chums.
