HOOVERETTES
by ANNA STEESE RICHARDSON

MRS. HOOVER'S quick wit and tact will stand her in good stead if she succeeds Mrs. Coolidge as first lady of the land. This incident proves the point:

Well known as are the Hoovers in Palo Alto and friendly though they have always been with the faculty and students at Stanford University, when Mr. Hoover returned to his old home in July, candidate for the highest office at the command of the American people, a natural chasm seemed to open up between him and his neighbors. In spite of bands and college songs and university yells, at sight of him there swept over the crowd a sudden realization that before them stood the man chosen by the Republican party to lead it to victory. The thought of his new responsibilities and his

great opportunities gripped the welcoming crowd and it turned quiet.

In simple, direct language some one congratulated Mr. Hoover and told him how glad his old friends were to see him. With equal simplicity Mr. Hoover replied that he was glad to be back.

Then ensued silence until Mrs. Hoover stepped forward. She recalled that in their student days, just one phrase had been generally used at Stanford to express inaction as to the next move. She seized upon the old slogan:

"Well, do we ride or straggle?" Shouts of laughter greeted the familiar question. The ice was broken. The awkward moment passed. The Hoover neighbors pressed forward to offer their congratulations.

A number of young people of Estacada who were driving about the city Sunday night, narrowly escaped serious injury when their cars came together on lower Main street. One car was quite badly damaged.
