NEW CHEVROLET SIX CAR IS ANNOUNCED

The announcement of a new six cylinder Chevrolet replacing the former four cylinder car with prices unchanged has created something of a sensation throughout the entire country.

In connection with this announcement the statement was made that the new car would sell at prices approximating \$200 less than any other six on the market, and with no raise at all in price over the former four cylinder Chevrolet except in the case of the two-door sedan which has been raised \$10 and the convertible landau, which replaces the imperial landau and will sell for \$30 more than the former job.

There have been rumors of the Chevrolet coming out with a six cylinder car for several months but the announcement made by W. S. Knudsen, president and general manager of the Chevrolet Motor company, made in Detroit on November 16, was rendered spectacular by the fact that this new car was to be sold at practically no raise in price.

Equipped with a six cylinder valve-in-head motor, fully enclosed, and with a high compression non-detonating head, the car is said to have done better than 70 miles per hour in tests at the General Motors proving ground in Milford, Michigan, and, yet, at ordinary speeds is reported to have given an economy of better than twenty miles to the gallon. Because of the ample power provided in the new six cylinder motor, in addition to its flexibility, it has been possible to equip the rear axle with a comparatively high gear ratio of 3.18 to 1, which reduces the turn-over speed in the motor in comparison to road speeds without lessening the car's ability to climb hills and make quick get-a-way in traffic.

The motor has a bore of 3.5-16 inches and a stroke of 3.3-4 inches. The piston displacement is 194 cubic inches. On accurate tests in the General Motors laboratories, this motor has developed 46 horse power at low engine speeds and is of particularly rugged construction with a crank shaft weighing 46 pounds. The car is equipped with A-C air cleaner, an automatic fuel pump which replaces the former vacuum tank feed; a carburetor with automatic accelerating pump and a special system of automatic lubrication for the entire rocker-arm mechanism and for all valve operating parts.

The lines of the new car are particularly attractive with flat hood and stream line effect, making the car comparable in appearance with many cars costing more than twice as much money. All bodies for the new Chevrolet six are of Fischer craftsmanship and are being finished in most attractive Duco color schemes. The upholstery on the enclosed models is particularly attractive and of long life.

A feature which will be of special interest to the driver of the car is the fact that in all closed models the front seat is adjustable, rendering it possible to fit the driving position of either tall or short operators.

The instrument board and dash arrangement is particularly attractive and is of the indirectly lighted type, equipped with ammeter, oil-pressure gauge, speedometer, spark hrottle and choke controls and a motor wheel base of the car remains or temperature indicator. While the wheel base of the car remains the same as in the former model of the car, 107 inches, the bodies have more room on the interior and are more convertible and more elaborately finished.

The line consists of a roadster, a phaeton which replaces the former touring car, the coach or two-door sedan, the coupe, four-door sedan, sport cabriolet, convertible landau which replaces the former imperial landau and includes three commercial types in a light delivery chassis, a one and one-half ton utility truck chassis and a sedan delivery.

Production of the new car probably will not begin on the Pacific Coast until about December 10 although preparations are now under way through the readjusting of machinery and the making of necessary changes in the production line made necessary by the complete change in models.

The new cars will be shown on a progressive basis throughout the United States between the 24th of November and the 22nd of December in the principal cities of the United States. Shipments to dealers will be made between the middle of December and the first of the year in such a way that cars will be in the hands of dealers for display and delivery on or after January 1. President Knudsen stated in his announcement that no cars would be delivered at retail prior to January 1.

Announcing -

The Outstanding Chevrolet of Chevrolet History

- a Six in the price range of the four!

The Chevrolet Motor Company announces The Outstanding Chevrolet of Chevrolet History... a Six in the price range of the four!

Spectacular as Chevrolet's achievements have been in the past... notable as its engineering triumphs have proved themselves to be - this remarkable new car dwarfs every previous Chevrolet accomplishment. Not only does it introduce into the low-priced field an entirely new measure of performance, comfort, beauty and style - but it is sold at prices so low as to alter every previous conception of motor car value.

The new six-cylinder valve-in-head engine - developed from more than a hundred motors designed especially for this sensational car - stands out as an engineering masterpiece. With a power increase of approximately 32% over the previous Chevrolet motor, with sensationally greater speed and faster acceleration - it offers a type of performance that is literally astounding. And it affords an economy averaging better than 20 miles to the gallon of gasoline!

In appearance, this Outstanding Chevrolet is destined to become an automotive sensation - so smart, so stylish and so distinctively appointed that it rivals the costliest custom creations! The marvelous new Fisher bodies are longer, lower and roomier with adjustable driver's seat in all closed models - and reveal the matchless artistry of Fisher designers. With their modish new colors, their smart

dual mouldings and their distinctive concave pillars, they achieve a degree of original beauty that has seldom been equalled in motor car design.

You are cordially invited to visit our showroom and secure complete detailed information about this sensational new car which will be ready for delivery beginning January 1st.
