

SPRINGWATER

Donald Moore, Springwater grade school pupil, who won first place here in the county declamation contest, scoring 96 points, and also winning the fountain pen given as first prize by the local Parent-Teacher Association, also won first place at Estacada last Friday, scoring 92 points, and is now entitled to go to Gladstone on Friday, the 15th, to compete with the scholars there.

Callers at the home of Mr. and Peter Erickson during the week were Mr. and Mrs. Aycock and Mr. and Mrs. Wheeler.

Mr. Bryon Moore and Earl Closner are at home visiting for a few days. They were accompanied by Fred Closner, who came to visit his little daughters, Patricia and Shirley.

Mr. and Mrs. William Kandle, of Estacada, were visitors in Springwater Friday, calling on Mr. and Mrs. Wheeler.

The Springwater grange, at its meeting held on Saturday, the 9th, decided to again hold a community fair and wishes everyone in this and neighboring communities to bring exhibits. Members of the fair board are Ed. Shearer, Loren Tenney, Peter Erickson, J. A. Shibley, Frank Wheeler and Ed. Closner. It was also decided at the meeting to petition the county court to designate as a market road the 1 1/2 miles of road connecting the Logan-Springwater highway with the Foothills highway.

Mrs. Mary Horner, as lecturer of our local grange, left Sunday for Corvallis, to attend a three-day school for grange lecturers. One of the principal speakers of the session will be the national grange lecturer. Mrs. Horner will return Wednesday evening.

The members of the Springwater Presbyterian church have decided to install as minister, about the 1st of April, Rev. Hollingstead, who was here and preached about three weeks ago.

GARDEN CLUB HAS BEAUTIFICATION PLAN

Spring and clean-up time will soon be here and it is time to take inventory of our assets and liabilities in regard to our relations with the outside world. Wouldn't it be well to view our city through the perspective of other people's eyes, as it were? We know that there are thousands of people roaming all over our land during the tourist season, which in these days really includes nearly every month in the year. Not all of these people are looking for new locations in which to live, it is true, but a certain percentage of them are, and they are going to choose the place that appeals to them most—scenically, climatically and, of course, financially. The climate and opportunities for making a living should be stressed and especially our wonderful ginseng gardens. But the scenic possibilities could also be enlarged upon, and is "one bet" that most cities overlook. One bid, then, for distinction would be to make this place so outstandingly beautiful that it would be nationally advertised. But, aside from the material benefits to be derived, it would be a matter of enormous satisfaction to be able to say, "I live in Estacada, the city of lilacs and lilies" (or other distinction, as the case may be).

Neat yards, painted buildings and fences and the elimination of tumble-down structures and other unsightly trash, would do much towards advertising our "good housekeeping." But blossoms, blossoms, everywhere would be the crowning touch.

This locality is unusually beautiful, anyway, and affords a wonderful background for gorgeous splashes of color. There are innumerable combinations of shrubs and flowers that could be used. We realize that the chief problem in connection with an improvement program would be maintenance and upkeep, but co-operation can do it; teamwork can accomplish much.

The Garden Club has a tentative program of beautification, which includes, as a beginning, the planting of trees, shrubs and flowers on Main street, out towards Wade's service station. But, in order to do this, considerable co-operation on the part of citizens, whether affiliated with the Garden Club or not, would be necessary (labor probably), and would be appreciated.

What do you, and you, and you, think of it? Can we all boost? Let's do it!!!

THE GARDEN CLUB
(By Mrs. A. H. F.)

On complaint of her son-in-law, Mrs. Elizabeth Colver was ordered by court to quit his home and leave London forever.

VIOLA

Viola, Feb. 12. — (Special). — We are still having cold nights, but with warm sunshine in the daytime. The coldest here was 2 above zero, one night last week. We are all hoping to see the snow melt and to have good weather soon.

M. L. Mayor of Portland will put up a mill here in the timber that he bought, just as soon as the weather settles.

Mrs. Louisa Nelson, our school teacher, has kept the school going, except for one day, when the snow and cold kept the scholars home, and school was dismissed. There have been some absent on account of sickness, but all are improving now and hope to be back soon. There are 18 children attending this winter.

The P.-T. A. of Viola is to have a basket social at the church on Friday evening, February 22. Earl Lankin, who has charge of the program, expects to make it worth while for everybody to come out and spend a pleasant evening.

Mrs. Whitfield has returned to her home in King Valley. Her daughter, Ruth, who has been in a Portland hospital, and her son, George, who also has been in the hospital, went home with her. They spent a few days at the home of Mrs. Bob Mattoon, before leaving for their home.

Mrs. M. L. Sevier had the hard luck one morning, in building the fire, to put her false teeth amongst some paper and burn them up.

Mr. and Mrs. Emery Powers, with her mother, Mrs. Emerson, spent the day, Tuesday, at the home of Mr. and Mrs. Eldon Lankin, in Gresham.

NEW FORD ENGINE HAS LOTS OF POWER

The engine of the new Model A Ford car represents one of the most remarkable engineering accomplishments in the history of automotive development. While not radically new in principle or design, it represents a new combination of engineering principles which has produced the best tested performance features of the older types of automobile engines with the most important features of the newer types.

Without abandoning entirely the principles of the old low-compression, low-speed motors in favor of the extremely high-speed, high compression type, Ford engineers have developed a medium speed, medium-compression motor that has proved itself much better adapted to the needs of a light car. A wide variety of uses under all sorts of road conditions and in widely varying climates are thus served more satisfactorily than would be possible with a radically high-speed, high-compression motor.

Its power, smoothness and flexibility are remarkable for its size and weight. The Model A motor develops 40 brake horsepower at 2,200 revolutions per minute. In accounting for this performance credit must be given to the following improvements: An induction system which permits a better and more uniform flow of air and fuel to the combustion chamber; redesigned valve and combustion chambers, which give higher, more uniform power impulses; lighter but stronger reciprocating parts and increased bearing sizes, which result in sturdier construction and consequently much smoother operation; newly designed hot-spot manifold which gives unusually efficient carburetion and there is also improved timing.

The combination of these features has produced a motor that gives unusual speed and power for its size and weight and at the same time one that is long-wearing, economical in fuel consumption and simple to operate and maintain. Because of its comparatively low speed, it does not work the self-destruction that comes as a natural result of wear when moving parts are operated at the higher rate of speed, and yet it has considerably more power, speed, smoothness and flexibility than the low-speed motors.

Here and There

Remorseful after stealing an automobile, Edgar Chastin, of Evansville, Ill., drove back to return it and was arrested.

Rats cause damage in Great Britain estimated by the government to be more than \$200,000,000 annually.

Of the thousands of kinds of wild animals in the world, man has domesticated only about 60.

Herman Kenner, of Chicago, landed in jail for stealing a wedding ring for his intended bride.

Mrs. Florence Keith walked 60 miles from Wisconsin to Chicago, to have her husband arrested.

FARM REMINDERS

A three-year survey of egg production in Oregon has been completed by the experiment station. On 154 farms there were produced 1,356,764 dozen eggs. The average cost per dozen was 28.1c. The survey was mainly in the Willamette valley but was carried to some extent into Umatilla and Deschutes counties and Umpqua and Rogue river valleys.

Oyster shell scale on apples may be an important pest in parts of Oregon during the coming season, believes the experiment station. Growers who find the scales on an occasional fruit had best examine the bark of their trees for the scale. Sprays of lime-sulphur, 12 gallons of concentrated solution to the 100 gallons of water, applied in February, is the standard control for this pest.

In starting a new asparagus plantation in Oregon it is most important to recognize the value of strong crowns which are to be set, for the size and vigor of these as well as the selection and breeding of them has a great deal to do with the future yields and vigor of the plantation as a whole, says the experiment station. One may have the choice of starting the plantation from pedigreed crowns or buying the seed from which one's own plants may be raised.

That interest in dairy herd improvement is on the increase in Oregon is shown by the various expansions under way in different parts of the state. Coquille valley is planning to have two associations for this purpose, the Crook-Deschutes association is planning an expansion, and dairymen of Lane county are considering the organization of an association. One group reports that more herd owners wish to join than can be accommodated. This work is carried on under the direction of the dairy department of the state college.

Here and There

Signorita Amelita Dorciallo, declared the most beautiful girl in Italy, uses only olive oil for her complexion.

Opposing his wife's divorce suit, Alfred Leonard, of Belfast, pleaded his wife had no use for him after twins were born.

J. L. Hodgkinson, 32-year-old Londoner, has requested that when he dies his body be cremated in a blue coffin representing the sky, and that his ashes be scattered to the winds on top of Bunny Hill, near Nottingham.

A large vegetable brush is very convenient for sprinkling clothes. The moisture is spread evenly and easily.

HOME POINTERS

(From School of Home Economics)
To unmold jellied dishes, a cloth is wrung from hot water, laid over mold and patted down with the hands. After a minute the jelly should slip out easily; if it does not, the process may be repeated.

A wire corn popper is a convenient utensil for broiling frankfurters. They may be placed in this and held over the fire and shaken around as they brown.

Spiced nuts are made just as salted nuts, except that powdered cloves and cinnamon or mixed spices are sprinkled over when cooking, in addition to the salt.

Celery curls are made by cutting celery in two to three inch lengths and gashing many times, almost to the end, then leaving in cold water until curled.

A ring mould for gelatin may easily be contrived if a regular mold cannot be secured. A glass fruit jar is placed in a round bowl, and filled with ice or ice water. The gelatin mixture is then poured into the space around the jar. When firm remove the ice and pour warm, not hot, water into the jar. Take out carefully.

Meat salads are improved if the meat is marinated with French dressing. Any cold meat, if combined with the right vegetables, may be made into an attractive salad to serve as the main dish of a luncheon.

Many housekeepers find their shortening becomes rancid soon after the container is opened. This can be prevented if the can is kept dry, tightly covered and in a cool place.

In making meat cakes from hamburger, a good practice is to flour the bread board and roll the meat to the desired thickness, then cut with a biscuit cutter.

Celery may be prepared for use several days or hours before using if washed well, cut in desired lengths, and put in closed jars in a cool place.

Brushing potatoes with a small amount of fat before baking will keep the skins soft.

To slice hard-boiled eggs perfectly, a good method is to dip a knife in boiling water and wipe it dry. Fresh bread may also be sliced this way.

A few slices of lemon or a small bag of spices cooked with sweet prunes will improve their flavor. Oregon prunes have a tart flavor naturally.

Rinsing the hands in cold water immediately after paring onions will remove all odor.

LIBERTY THEATRE

Thursday and Friday, February 14 and 15—
Buster Keaton in—
"THE CAMERAMAN"
—If it hurts to laugh, stay away from this one. Tong wars, boat races, riots and thrills in a glorious melody of laughs.
Comedy, "Song to Nuts."

Saturday night (only) February 16—
Scathing melodrama of the Kentucky mountains
"JUDGMENT OF THE HILLS"
With Virginia Valli and Frankie Rarro. Mighty relentless passions surging through untamed breasts! The Kentucky hill country, torn by feuds and selfish petty wars, learns through the faith of a little boy that their country's trials come before all else—that content comes only through pain. Comedy, "Water Bugs."

Sunday and Monday, February 17 and 18—
Zane Grey's
"UNDER THE TONTO RIM"
The picturization of Grey's latest thrilling novel. Out-fighting, out-riding—out romancing any of his past successes. A thrill swept love story of the old days before Arizona became a state. With a cast of youthful players headed by Richard Arlen and Mary Brian. Also Pathe News Reel.

Wednesday (only) February 20—
Special benefit show given by the American Legion Auxiliary
"NOISY NEIGHBORS"
Lights and shadows—magic and might—tears and laughs—love and hate combined in this breezy entertainment from Booth Tarkington's pen! Comedy, "Smith's Picnic."

Thursday and Friday, February 21 and 22—
Karl Dane and George K. Arthur in
"BROTHERLY LOVE"
The warden loved his daughter—Dane and Arthur loved her, too! Pardon us! He pardoned them! Comedy, "Imagine my Embarrassment."

Admission: Adults, 25c; Children under 14, 10c
