Your Opportunity Here in "Everybody Wins" Campaign

(Continued from page 1)
Your votes, and the only thing will win for you. The votes alone you have to do to win the very biggest prize in the entire list is to have the most votes.

No, It's Not the Times
Here it is in a nutshell: If times are slow, then the total vote will probably be less. You win just the same. It can't be the times. What is it, then?

Apparently there are a lot of folks just sleeping. They have been sympathizing with themselves so long that they can't hear opportunity when it knocks at their door. Opportunity is here—the few names that have been entered will be published, including the votes cast up to Thursday noon, next week, and the distribution of prizes will soon be made and this mammoth event will rapidly pass into history.

With conditions as they are; with so many really crying for more money, with so many looking for an opportunity, to add to their income—why don't more live ones enter this campaign and carry on to win? That is the question—WHY?

Prosperity for You
Don't kid yourself with the idea that you are too big to help yourself. The world will respect you if you prosper; you'll find little sympathy if you haven't got the nerve to fight out your own salvation. Opportunity is here for you. You should grasp it now!

What can you do with almost one thousand? Have you a place for it? Can you find any honest excuse for not helping yourself?

Clip the nomination blank in this paper. That means 10,000 votes. Come to the Clackamas County News campaign office at Estacada or Sandy and learn all about this. Then go to it! YOU CAN WIN!

The More the Easier
The more candidates entered the easier it is for you to secure a car or other prize. How is that, you ask? It is like this: If there are only two candidates running for the office of sheriff of Clackamas county the winning candidate must have over half the votes cast in order to win. But if there are five candidates seeking election as sheriff, the winner needs to have more than any of the other four. In other words victory comes to the winner with far less votes when five are running, than when two are running. Yet the total vote cast in each instance may be the same.

You can win if you are determined to win. The opportunity is here and it's up to you. You will make the decision. Can you afford to let such an opportunity go by?
