\$100 in Gold-Point Schedule Ends This Saturday Night

Saturday Big Day for Live Candidates in Clackamas County News Free Gift Distribution--Leaders Run Close-- \$100 in Gold Means \$50 a Week Extra

Last Tuesday candidates started on the new campaign in which an extra prize of \$100 in gold will be given to the candidate who secures the greatest number of points in subscriptions turned in between last Tuesday and Saturday night, March 30. Every candidate, regardless of his or her present standing, started on an equal basis on this special prize.

The efforts of candidates for the next ten days really have a double prize value. Every subscription turned in during the next ten days not only counts the regular number of votes toward the original prizes of big motor cars, etc., but they also count points toward the extra prize of \$100 in gold; it means \$50 a week to you.

Many more points are given for subscriptions on this special prize if turned in Saturday night of this week than if turned in after that time. Your efforts between now and Saturday night are worth a great deal more to you in both points and votes, than they will be after Saturday night. Now is the time to exert every possible effort and secure every available subscription.

10-Year Subscriptions Count
Up until Saturday night every 10-year subscription counts a total of 510,000 votes and 50 points. Just a dozen of these will count over 6,000,000 votes and 600 points.

The attention of candidates is again called to the big vote value of the second payments on subscriptions—that is—extensions of subscriptions received earlier in the campaign. In securing these candidates should be sure that the receipt stubs are plainly marked "second" or "third subscription" or extension and the amount of the first subscription shown.

If there is any part of the second payment plan you do not understand, it is your duty to consult with the campaign manager at once.

The race is so extremely close on the home stretch that it is surprising how many of the favorites are picked to win. This is probably due to the fact that most of the candidates have such splendid scores that a few sub-

scriptions in favor of any candidate would make a new leader in the race.

Big Votes End Soon

One week from Saturday night at 9 o'clock sees the close of the last big vote schedule of the race—this ends the biggest remaining vote offer of the campaign. After Sunday subscriptions count for many less votes and points. For this very reason the time between now and one week from Saturday night is by far the most important of the home stretch. Whoever goes out in front these next few days will have the best chance of all toward landing the big motor cars originally announced and the extra prize of \$100 in gold.

Point Schedule Drops

Saturday at 9 o'clock marks a big decrease in the point schedule turned in on the new special prize of \$100 in gold. Up until 9 o'clock Saturday you receive many more points toward this extraordinary prize on each subscription than you will receive the following week. This week and next your best efforts really have a double prize value.

Every subscription you turn in this week counts the regular number of votes toward the original grand capital prizes and at the same time the same subscriptions count the maximum number of points toward the additional \$100 prize.

What Will You Do?

What are you going to do the last few days of the big vote schedule? Are you going to take advantage of them and win or are you going to rest on your oars and lose? It all depends on what you do between now and Saturday night, March 30.

Some of you candidates, after this campaign is over, will see where just a little extra effort would have brought you a few hundred extra dollars. Will you be one of those or are you going to come out on top? It is entirely up to you!
