LIFE IS WHAT WE MAKE IT

"Life is what we make it,"
Someone said this long ago—
I'm inclined to believe it.
Although I do not know
Just how we bring about
The atmosphere of gloom
That sometimes envelops us
And throws us out of tune.

It may be only a slice of toast
A little bit too brown,
That brings onto a smiling face
An unbecoming frown.
We always criticize
The ones we love the best,
And save our company manners
To entertain the rest.

We oft withhold words of praise
That would brighten another's life,
And oft we utter grievous ones
That stir up endless strife.
"Life is what we make it,"
Tho' 'tis filled with ups and downs,
And better far a crooked grin
Than a face all creased with
frowns.

WHEN FOOD SOURS

ABOUT two hours after eating, man-
y people suffer from sour stomachs.
They call it indigestion. It means the
stomach nerves have been over-
stimulated. There is excess acid. The
way to correct it is with an alkali, which
neutralizes many times its volume of
acid.

The right way is Phillips Milk of
Magnesia—just a tasteless dose in water.
It is pleasant, efficient and harmless.
It is the quick method. Results come
almost instantly. It is the approved
method. You will never use another
when you know.

Be sure to get the genuine Phillip
Milk of Magnesia, the kind physician

Registered Trade Mark of The Charles
H. Phillips Chemical Company and its
predecessor Charles H. Phillips since
1875.

CORN DEMAND EXCEEDS HOME-GROWN SUPPLY

Oregon's acreage of corn grown
for grain could be increased 100 per
cent or more without overproducing
for the present state demand, accord-
ing to the 1931 corn outlook report
just issued by the Oregon State Col-
lege extension service. Corn ship-
ments into the state total several
times the amount of home-grown
corn sold by farmers.

Sales of corn for cash from Ore-
gon farms have not exceeded 200 car
loads a year, according to the best
available information at the college.
Although information on the total
amount shipped into the state is in-
complete, nearly 1,400 carloads have
been received at Portland alone in
each of the past two years.

Evidence of the shortage of home-
grown supplies of corn is also found
in price statistics. The farm price re-
ceived by corn growers in this state
has been from 20 cents to 30 cents
a bushel more than the average for
the whole country.

The general corn outlook for the
United States indicates a five per
cent increase in acreage, says the
college report. Production is likely
to be above average, although it is
too early to estimate yields. The
carryover of corn from the 1930 crop
is expected to be less than average.

Fishing Season Opens On Wednesday, April 15
