Raise Funds For Society

Solicitation of funds needed by the boys and girls society of Oregon is going forward rapidly thruout Clackamas county under the chairmanship of Dr. C. K. Chapman of Oregon City.

The boys and girls aid society is a state wide agency which provides for dependent and neglected children. Operating on the foster home plan basis the society finds homes for its wards in private families, pays board, supplies clothing and provides medical and dental attention. At the present time 355 children are receiving care under its supervision.

The appeal for funds is being conducted on a state wide basis with a campaign unit in each county. Purpose of the drive is to provide sufficient additional funds to meet the rising cost of living.

Fifty-five percent of the children under care of the boys and girls aid comes from counties other than Multnomah officials point out yet Multnomah is the only county which provides substantial financial aid to the society thru private sources.

Howard C. Bolton of Canby represents Clackamas county on the honorary board of the society.

Program of Defense Councils

The Oregon state defense council as organized by Governor Charles A. Sprague calls for the volunteer mobilization of Oregon's citizens in all walks of life into groups prepared to cope with any situation which may develop under the "unlimited emergency" proclaimed by the President of the United States.

Special committees are being formed under functional divisions to study specific problems and to recommend methods for handling them. On these committees will be appointed heads of state departments in nearly every branch of government; labor, industrial and utility executives. Among the committees being organized are those dealing with civil protection, transportation, communication, industry, natural resources, sanitation and public welfare, recreation, housing, emergency shelter, information and public relations, war financing, nutrition, price stabilization and consumers interest.

To reflect public opinion over the state and to lend counsel in the development of public policies respecting Oregon's participation in defense activities Governor Sprague has appointed an advisory council comprising prominent citizens from every section of Oregon.

Establishment of county defense councils is now under way and steps will be taken shortly to carry the plans for civilian defense direct to the people.

To coordinate the operations of the various committees and councils under the Governor there has been appointed a state coordinator with offices in Salem.

Each member of the Civil Reserve will be furnished an identification card certifying to the nature of his appointment in home defense service.

Those enrolled for police and guard duty will be deputized under local authorities and given intensive training involving disciplinary drill and the technique of police work. Instructors will be furnished by the Oregon state police where competent men are not available locally. Under the state fire marshal provision will be made to provide similar technical instruction for members of the fire fighting reserve.

Stress is being placed on the early formation of that branch of the civil reserves available for disaster service. All ready to be adopted into the state wide plan are existing units formed by the American Legion and American Red Cross.

Women will be enrolled for special duty in branches of disaster service where they best can serve.

Immediately available for the use of the authorities in enlisting the civil reserves is a home defense census of some 12,500 members of the American Legion in Oregon completed just two months ago.

At the base of the entire defense plan will be the county defense councils. These will each consist of a central committee of from four to 24 members and include the county sheriff, county judge, district attorney and probably the mayors of the larger cities within the county. Appointments will be made from the civil reserves to handle every branch of defense activity which appears essential in the county affected. Functional charts will be furnished by the state organization to insure uniformity of procedure.

Larger industries of the counties will be represented on the county councils. World War veteran groups will be called upon to carry out a large part of the responsibility due to their special training and knowledge of defense problems.

It is realized that no plan outlined by the state defense council can fit every county but the functions thus outlined will be incorporated into every county setup to provide uniformity and centralized control.

Each county defense council will appoint a coordinator in addition to a chairman and vice chairman. It will be the duty of the coordinator to act as intermediary between the local and state councils and to keep the state organization advised promptly of any changes in operating plans or personnel.

The county council coordinator should be an administrator who has sufficient time at his disposal to handle the work involved without compensation. State defense is based on volunteer service and such administrative expenses as stationery, stamps and envelopes, telephone, etc., must be met by the county organization out of funds raised for these purposes. Among the suggested sources of county coordinators are the secretaries of local chambers of commerce and deputies in city or county offices.

The county defense council will be charged with the responsibility for selecting a volunteer personnel for the operation of all county activities to insure a closely knit, functioning organization. Every key man on a local defense committee should be provided with a second in command who would stand ready to take over in the event of his absence or disability. Death or removal from the county of committee heads should be reported immediately to the state coordinator together with the names of successors.

Several cities and counties in Oregon already have a functioning home defense organization. It is not intended to disrupt such groups but rather to bring them into the statewide program with as little disruption as possible. The only changes which will be suggested will be in the interest of coordination with others working toward the same goal.

Enrolling Men in CCC

Applications are now being taken for enlistment in the Civilian Conservation Corps for July enrollment.

To be eligible to enroll in the CCC a young man must be:

- 1 A citizen of the United States.
- 2 Unemployed and in need of employment.
- 3 Of good character.
- 4 Between 17 and 23 1/2 years.
- 5 Unmarried.
- 6 Out of school.
- 7 Physically and mentally fit and able to do vigorous work.

In order to be selected each applicant must agree to serve one full term of six months. Ordinarily he must agree to serve in any CCC camp in the United States. An enrollee may decide at the end of his six months period to reenroll for another period. The maximum length of service is two years.

CCC enrollees are paid in two ways. Part of their wage comes in good food; sturdy clothing; and educational and recreational opportunities.

Regular CCC enrollees are paid \$30.00 a month in cash. Those with dependents agree to allot \$15.00 to them; \$7.00 per month is put into a savings account and paid in a lump sum when they leave the CCC. Thus an enrollee staying 6 months is paid \$42.00 which he has saved when he finishes his enrollment. If he stays a year he is paid \$84.00. An enrollee is paid \$8.00 a month for his personal expenses.

Opportunities are given to complete the general education and to learn special vocational trades. Types of training offered at the various camps include:

- Bridge construction.
- Carpentry.
- Concrete construction.
- Diesel engine operation.
- Drafting.
- Jack hammer operation.
- Landscaping.
- Sign painting and making.
- Stone masonry.
- Surveying.
- Truck driving.
- Welding.

Boys wishing to enroll for July should apply at the Clackamas county public welfare commission, room 11, Court house, Oregon City at once.

SATIN MOTM IS OUT AS ECONOMIC PEST

A survey of the Willamette valley to determine whether or not the satin moth is doing appreciable damage to poplar and willow trees leads Chas. A. Cole horticulturist with the plant division of the state department of agriculture to reply in the negative.

The satin moth is being controlled successfully by parasites and is not now considered a pest of economic importance to this area. The heavy infestation of a few years ago has virtually disappeared.

This pest has in the past shown a preference for the silver poplars of this state though it attacks also willows and other poplars.

TURKEY IMPROVEMENT ASSOCIATION TO MEET

The first annual meeting of the newly organized Oregon Turkey Improvement Association and the Oregon Poultry Improvement Association will be held at the poultry building on the Oregon state college campus on July 11 and 12 according to county agent J. J. Inskeep. The turkey meeting is slated for July 11 and the poultry meeting the following

PARTNERS in profit...

TO SAVE YOU MONEY!

JOHN DEERE
TRACTORS AND INTEGRAL EQUIPMENT

Savings in time, labor and effort . . . plus better work . . . that's what John Deere "Partners in Profit" do for you. A John Deere general purpose tractor equipped with integral equipment gives you a working combination that spells real low-cost performance at all times. Whether it's an integral plow, planter, mower, middlebreaker, cultivator, lister, corn picker, sweep rake, etc., you'll find it "tailor-made" for your John Deere Tractor, especially designed to do more work for a longer time with less effort and at a lower cost.

day, July 12. Both meetings start at 10 o'clock in the morning. According to the county agents office poultry and turkey producers in Clackamas county are invited to attend.

The election of officers, business meeting and a review of the past years business will be part of the program at each meeting. Producers will be given ample opportunity to make comments or suggestions regarding the programs.

At the turkey improvement association meeting that will be held on July 11, Prof H E Cosby will discuss feeds and feed formulas and Dr E. M. Dickinson will discuss pulmonary diseases in turkeys.

One of the federal coordinators of the national poultry improvement plan from the U. S. department of agriculture will attend the poultry improvement association meeting and will discuss changes in the plan. G. W. Avery, Oregon's delegate to the national poultry improvement plan conference will report on the convention.

TENT CATERPILLAR IS BAD IN SPOTS

The tent caterpillar which appears in cycles of about every five years has reached a peak this season in some sections along the coast and in the Sheridan area. However natural parasites will control the heavy infestations says Chas. A. Cole, horticulturist with the plant division of the state department of agriculture.

The tent caterpillar is no pest in orchards that have been sprayed with arsenate of lead one spraying of which will give complete control.

This is vividly illustrated this season in a Polk county apple orchard. Only part of it was sprayed. The caterpillar defoliated the trees not spray

ed but left alone those given one dose of arsenate of lead.

Styled as the greatest musical show of them all "The Great American Broadcast" comes to the Estacada theatre this Sunday, Monday and Tuesday July 6, 7 and 8 starring Alice Faye, Jack Oakie, John Payne and Cesar Romero.—Adv.

CHRISTIAN SCIENCE CHURCHES

"CHRISTIAN SCIENCE" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, June 23.

The Golden Text was, "The Lord hath made bare his holy arm in the eyes of all the nations; and all the ends of the earth shall see the salvation of our God" (Isa. 52:10).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Thomas saith unto him, Lord, we know not whether thou goest; and how can we know the way? Jesus saith unto him, I am the way, the truth, and the life . . . And I will pray the Father, and he shall give you another Comforter, that he may abide with you for ever" (John 14:5,8-16).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The promises will be fulfilled. The time for the reappearance of the divine healing is throughout all time; and whosoever layeth his earthly all on the altar of divine Science, drinketh of Christ's cup now, and is ended with the spirit and power of Christian healing" (p.55).
