Potato Diversion Plan Field Profitable to All

The diversion of potatoes for feed purposes in Oregon and neighboring California counties returned growers approximately \$250,000 according to figures compiled at the state AAA office in Corvallis.

Approximately 600 cars of potatoes were diverted for feed purposes which according to estimates of leading growers raised the market price of some 2500 carloads shipped by at least 20 cents a hundred pounds. This would amount for an increase in gross returns to growers of \$175,000. The price paid for diversion at the rate of 25 cents a hundred pounds for the 600 cars diverted will be about \$60,000 while the farmers received an estimated \$15,000 in feeding value which makes the estimate total of \$250,000.

Crook, Deschutes and Klamath county areas and portions of Modoc and Siskiyou counties in California were included in the diversion program handled by the Oregon AAA.
