tative criticism of thhe gevenment's Company of America not only used handling of the defense program has its own money for expansion and lowrecently appeared. It came from the ered the price but of its own initia-House of Representatives' Military tive trebled its production". aftairs committee, Sixteen members report while nine voted to suppress

The report criticizes among other: Secretary Ickes "for putting petty quarrels above national interests" to use David Law.ence's phrase. This criticism is based on the Interior Secretary's handling of the aluminum problem. To quote the report direct ly "The aluminum industry relies on power, electric power. Unwillingness of some government officials to provide hydro-electric energy from government dams in such an emergency as exists today is at least short-sighted. Whatever the merits of any controversy between so-called "monopolies' and the Administration it is the sense of this committee that a squabble at this time on the subject of monoply is a traggic and

inadequate production when it says: "All testimony before this committee What is probably the most authori- was to the effect that the Aluminum

Far more important is the section of this committee voted to publish the of the report which says, by inference, that the Administration has harmed the hational defense effort by refusing to sidetrack political projects which are unnecessary and unwise at this time. To quote directly again the house committee says: "Em-phasis over the last few years, has been made on social reform auther than national security. As a nation we seem to have forgotten that without national security social reform might well prove meaningless,"

So the country has been given high official authority to back up the many and varied criticisms of the handling of defense that have been made by economists, business men and otherwho have no connection with the government. The report cites a long

Reduction in Allotment Seen

Clackamas county wheat grower can expect a reduction in their 1942 when acreage allotments in accordance with the national and state allotments announced by the department of agriculture recently G. k, Cumberland chairman of the county AAA committee said yesterday.

The national allotment of 55 million acres for 1942 is the same as the 1939 allotment and is 7 million acres smaller than the 1941 allot ment. The state allotment is 756,281 acres. The allotment is based on adequate supplies of wheat for domestic consumption, export and reserves. Reduction in wheat acreage to prevent piling-up of heavy surpluses was necessary in view of a prospective carryover of around 500 million bushels on July 1, 1942.

Acrenge figures for each county, based on the lowered national and

state allotment have been worked out by the state AAA committee. County committees are proceeding with preparation of individual farm allot, ments for Clackamas county.

Keep Fire Out of Forests

Keep fire out of the forests and you will help provide powder for the army"s guns. ,the West Coast Lumberman's association pointed out today in an appeal to the forest-using public for extreme care with fire in the present period of high temperature and low humidity.

"Twenty-four new powder plants requiring a billion feet of lumber are a rush project of national defense that depends upon sustained produc tion of logs and lumber" the association stated. "West Coast lumber s also a key material of construction in naval bases now on emergency buil ding schedules. In many other fields of defense the Douglas fir is the tree behind the guns.

"Log reserves are commonly built up to keep the mills running when ummer fire-weather compels the closing of lumber camps. This year uch reserves were depleted during he recent strike. To meet urgent defense demands log production must be kept rolling despite fire weather.

"With this outlook timber opera; tors have expended their summer forces of forest defense for 1941. Fleets of trucks and tractors have been made ready and manned to convoy Oregon's and Washington's commercial forests thru the bazardous zones of heat and drouth. Patrols are cruising areas of fire danger along the fronts of 1500 operations in the Douglas fir region and state and forest industry men in every mountain peak lookout are keeping a 24-hour watch. Networks of rapid communication by telephone and short wave radio centering in the headquarters of state forester Nels Rogers and T. S. Goodyear of Oregon and Washington and n operation.

Free Enlargement at Davidson's Drug Store, Gresham, with any 6 or 8 exposure film finish at reasonable price of 25 .- Adv.

Weed Growth Proof of the tremendous strength of growing weeds was shown at Winnipeg. Manitoba, when a piece of lumber an inch thick, through which had grown a dandelion root, was found in a lumber yard.

Many Diamonds From Cullinan The largest diamond ever found, the 'ullinan, was made into nine large stones and more than 100 small ones

Temperature Estio The temperature of the earth increases one degree for every 200 feet below the surface.
