

Broadway Theater Offers Great Fare

Looking at the marquee of the BROADWAY THEATRE, we see now playing a terrific combination of pictures, both in technicolor. The first in Vista Vision is "GIRL RUSH" with Rosalind Russell, Fernando Lamas, Eddie Albert and Gloria DeHaven. Its a clever story about a girl who inherits a half interest in a Las Vegas hotel. She storms in to take over, only to find it mortgaged to the hilt—many interesting situations arise as she sets to work to make the money—evade the creditors and the wolves. Second big hit—"DUEL ON THE MISSISSIPPI" with Lex Barker, and Patricia Medina. A fabulous story of the river boat gambling days. River boat pirates duel with cutlasses for a thrilling, action packed climax.

Sunday, Monday and Tuesday-- John Wayne in action in the Orient. Costarred with lovely Lauren Bacall in notorious "BLOOD ALLEY" filmed in technicolor and Cinemascope. Two Americans and a group of Chinese slaves try to escape into Burma through a

Tremendous Advances Highlight Sixty Years Of X-Ray

The startling discovery of X-ray by Professor Roentgen is portrayed above.

The X-ray, "eye" of the radiologist or X-ray physician in modern diagnostic medicine, is 60 years old. The ray was discovered November 8, 1895, when German physics professor Wilhelm Conrad Roentgen was working in a small laboratory at the University of Wurzburg. Since then, this medical specialty has grown to the point where some 40 to 50 million people will have been X-rayed in 1955, according to the American College of Radiology.

Roentgen, described as "an experimental physicist of the old school," had built most of his own equipment and was working alone in the laboratory at the time of the discovery. The fifty-year-old scientist was repeating experiments of two earlier physicists, Hertz and Lenard, with cathode rays.

Today's modern diagnostic X-ray machine, reflecting sixty years of research and development, takes instantaneous X-ray pictures.

In experimenting he held solid objects between a charged vacuum tube and a screen coated with a fluorescent chemical. When the energy passed from the tube through the solid articles including his own hand, Roentgen realized he must be dealing with a new kind of ray. In the last experiment flesh and bones were outlined as on a modern fluorescent screen. Roentgen concluded from this that he had found a ray hitherto unknown. He called it the "x" ray for "unknown quantity." Scientists since have renamed his extra-short-energy wave the Roentgen ray.

When the news was finally announced it spread rapidly through the civilized world.

One of first X-ray machines in 1896 took 20-minutes to X-ray above patient's hand.

In February 1896 a school of applied sciences in Cleveland, Ohio, reported that "an excellent photograph of the hand was obtained with an exposure of twenty minutes." In contrast, today there is a new X-ray machine that is so fast it can even clearly picture on X-ray film a continually moving heart. The rapid exposure is made in only 1,000th of a second.

narrow corridor of water, 300 miles long. A action-packed dramatic picture that will keep you on edge of your seat from start to finish.

Wednesday, Thursday, Friday and Saturday-- Right from the pages of famous old literature -- Homer's Odyssey--an impressive work that is filled with adventure and plenty of action, colorful and unusual settings and very unusual situations. Kirk Douglas presents his filmization of this famous work called "ULYSSES." The story of the Trojan war in which finally at its end all the heroes return home except the king (Kirk Douglas.) He has been washed ashore on a lonely island and after a long illness returns to his country in tatters and rags. As he arrives he finds his queen about to marry another and then the adventure begins as Douglas again wins the queen's hand without revealing his identity.

SPRINGWATER

A large company of Springwater neighbors and friends gathered at the Grange hall on Monday, Jan. 2, for the traditional New Year's pot-luck dinner, a custom which originated in the days when the late James A. Shibley was annually feted on his Jan. 1 birthday. Among the guests who shared in the sociability of the occasion were the Rev. and Mrs. Arch Kearns, formerly affiliated with Springwater Church. Other out-of-town guests were Mr. and Mrs. Ken Petrie and family, who had come from Portland the night before to visit Elva's mother, Erma Tenny. Coming from Molalla as a guest of Art Snyder, son of Mr. and Mrs. W. H. Snyder of Elwood was Miss Margaret Pauls, a native of Germany, who has made America her home since last year. Also visiting was Joe Garrett, of Oregon City, a young friend who had been spending the weekend with Elmer Linn.

Elmer Linn was pleasantly surprised last Wednesday, Dec. 28, by a visit from his daughter and son-in-law, Mr. and Mrs. (Joy Linn) Ed Harrington, of Oakland, Calif.

Staying at the Elwin Shibley home since last Friday, when Jean and baby, James Henry returned from the hospital, is Jean's mother, Mrs. Henry McCloskey, of Portland. Also, Mr. McCloskey spent the New Year's holidays here.

New Year's day guests at the Everett Shibleys were Mr. and Mrs. Tom Bard, Forest Grove, and Mrs. Erma Tenny.

Mrs. Laura Tucker was a guest, last Sunday, at the home of her son, S. W. Tucker and his family, in Sandy.

The Carl Ohmans spent the New Year's weekend with friends in Portland, Mr. and Mrs. James Alt, formerly of Dodge.

Mr. and Mrs. Roy Baker drove to Eugene on New Year's day to return to her home Mr. Baker's mother Mrs. Nora Baker, who has been spending the past three weeks with them here in Springwater.

The Homer Newells drove to Tillamook on New Year's to bring home young Mike, who had been spending the week with his uncle and aunt, Mr. and Mrs. A. C. Marshall, and their children.

A very busy young lady at Monday night's Talent Show down town was Bonnie Howell who served as accompanist for a number of soloists and also played in the clarinet quartet.
