## Local U. S. Air Force Member Writes of World Fair at Brussels' Belgium

The following interesting article about the World's Exposition at Brussels was written by Robert L. Shook, formerly of Estacada, who is now an Airman Second class in the United States Air Force, stationed in Europe. Mr. Shook presents this description of the World's Fair in Brussels in order that his friends and neighbors in the Estacada area may know just what is happening in this event that so many and so few people will get a chance to see.

### WORLD'S EXPOSITION

By A-2C Robert L. Shook  
Since the 17th of April 1958, in Brussels, Belgium, an event has been taking place from early morning until late at night, an event that a lot of people have been reading about, a few have been seeing and a lot more have been wondering about it. The event, that is the World's Exposition for the year 1958, is no less than the World's Fair. In a series of articles you are about to have an insight by means of account of the event that will be talked about for the next five years.

On a certain day in July of this year, 8,061 Americans boarded six of the world's finest ocean liners to embark upon an adventure of Europe and no doubt many of them will visit this gigantic exposition.

Many articles in some of the world's leading papers and magazines are featuring many pictures and articles of the Exposition in general, but here is an endeavor to go inside many of the exhibits and show what exactly is happening.

Like the Eiffel tower of Paris, the Atomium is the symbol of Brussels World Fair and Brussels, Belgium. The atomium can be seen from several miles away from the Exposition and is much like a beacon on the beach for the many picturesque streets of Brussels.

The atomium is constructed like you use to study about the atoms and molecules when you were in school, with the center sphere being the neutron and the eight other spheres the electrons and protons. At night the atomium is lit up like a Christmas tree with hundreds of flashing lights, alternating in sequence to give the illusion that the lights are skipping about the gleaming metal surface like carefree birds. For a moderate sum of money, the visiting American or European can ascend to the top of the highest sphere to view all of the Exposition and a good deal of the city of Brussels. The five story walk upstairs is an adventure well worth the money and trouble standing in line and many different kinds of people from many lands and walks of life.

As the visitor walks around the atomium of the Exposition to waiting for your turn along with one exhibit to another, the foot-lore and weary traveler may for a few Francs, enjoy the notable excursion by one of the many motor scooters equipped with two passenger carriers in front, allowing the visitor to enjoy the sights of the streets and sidewalks and to travel to the site of his choice.

One of the first sights the traveler will be interested in is the American Exhibit, which is undoubtedly one of the best and the most interesting, even to the many camera carrying Americans. The first view of the American Exhibit is an most impressive one as the colorful swaying movements of the water fountains being sprayed from the water's surface of a circular ponds, being blended into the circular design of the plastic building. Once inside the building, through an ample amount of glass doors, the visitor is overwhelmed with the view of another huge pond, which occupies most of the lower floor. The exhibits of the building are all placed on a balcony running completely around the first and second floors. For the most part of the lower floor, the visitor will find booths showing moving pictures of things that most Americans won't give a second thought too, such as the "street corner" or "service station" or "super market" or just "street scenes" or maybe window displays or maybe just "farmers." To the American visitor, this is old stuff but just think of the European or Asian that has never seen anything like this, must mean to him. Also in the lower floor the visitor will find art, designs of cities, industries and automation machines. Also there is color television studio which features live programs all day long, which is one of the biggest drawing cards found.

All day long there is featured a fashion show featuring "ready made" clothes found in almost every store in the United States today. The models walk down an elevated stairway to a platform a few inches above the water in the indoor pool, and then back up the stairs again while hundreds of people crowd around the pool to view. On the second floor, the visitor will find many household appliances and garden equipment, also scale models of our nation's biggest cities. On one side of the building is a model street with store window displays set up. As you step outside onto the balcony on the second floor, the biggest drawing attraction, a modern theatre, is situated, drawing huge crowds long before the next sensational movie. Another drawing attraction is the modern "quick stop" restaurant and soda fountain.

All in all, the United States has an exhibit that does not brag and boast about the nation, but generally shows what the ordinary citizen can and does possess.

## Kiwanis Members at North Fork Dam Company 'D' Wins Praise in Training

THE ABOVE PICTURE IS WORTH A THOUSAND WORDS TO A TROOP OF THE NORTH FORK DAM AND PARAYING TWO WEEKS AGO. Bill took this picture so you wouldn't mind. It shouldn't be necessary to name the boys' names but if there's anyone you don't know, call Bob Cooke at the City Hall.

Company 'D', 413th Infantry Regiment USA, returned recently to their home Reserve Center at Estacada after two weeks of extensive field training at Yakima Firing Center, Washington, bring with them the praise of their division commander, regimental commander and the Sixth Army Inspector Team as outstanding in the conduct of their training.

Organized at Estacada as a company in February, 1947, this was their first annual active duty field training as a unit and as part of their regiment and they not only held their own with the veterans, but stepped out and set new standards for the others to reach.

Made up of an 81mm mortar platoon and a machine gun platoon, they received the praise of General Green, representative of Continental Army Command, who witnessed their firing. General Green stated it was the finest organization and conduct of a reserve unit he had witnessed in his 22 years.

There was nothing easy about the training. The company spent the two weeks in tenting every morning five a.m. and some of the day perfecting their marksmanship and machine gunners under temperatures averaging one hundred degrees. By the last week the high barren hills were just hills to the members of the company as they hand-carried their weapons up and over the many slopes. It was said that Company 'D' never walks—just runs.

To top off a most successful camp, Company 'D' polished off Headquarters and Headquarters Company of the regiment in a hard-fought contest played on a diamond of crushed rock to return home champions of the regiment.

To work with out a good meal or three squares makes life pretty miserable, but not in Company 'D'. The men in this unit think they have the best cooks in the Army and to back this statement, praises of quality were received from General Farmer and General Green and other officials who visited the unit during training.

Team work and fortitude made a successful two weeks training and this would not be if it were not for the ability and agility of the officers to teach these young men the right ways of team work. The next step to be better at the next summer camp training.

## Estacada City Council Sees Solution to Street Problem thru John Geil Ideas

The Street Committee of our Estacada City council has been working on a progressive and economical program. This is to be accomplished by city employees during slack periods.

John Geil, chairman of the city street committee has had occasion to observe the paving process used by the Forest Service which is being found to be successful. This same method can be employed on our streets.

The first step in good road building is foundation or base. Our present streets in the majority are rock-based with some, some oil-topping. This is a good starter for a good base by being graded, watered and packed. This process is repeated until a firm roadbed is formed ready for its oil topping.

The second step is the actual oil-topping process. The common term is road mix and means just that. A crushed rock aggregate is spread on the roadbed, given a coat of oil and mixed by grading into windrows back and forth. When properly mixed, it is then spread on the road evenly and rolled to complete the surface.

By this method, Mr. Geil says through proper budgeting of our street funds and decreased cost of maintenance, we should be able to bring our streets up to standard within a few years.

The first street slated for the new treatment will be Shafford where landowners have improvements long overdue which have been promised.

The second step is the actual oil-topping process. The common term is road mix and means just that. A crushed rock aggregate is spread on the roadbed, given a coat of oil and mixed by grading into windrows back and forth. ## BUSY WEEK FOR THE RANDOLPH SMITHS

A memorable and festive week for Mr. and Mrs. Randolph Smith on Elm and Lakeside Drive was celebrated on Sunday evening, August 24th at the missionary farewell meeting for their young son Norman E. Smith. Norman will leave home for a two year mission in the Gulf States for the Church of Jesus Christ of the Latter-Day Saints.

Visiting during the week and present for the farewell were all of the seven Smith children and 23 of the 24 grandchildren including Mr. and Mrs. Philip R. Smith and family of Hood River where Philip recently accepted a position with the government as a soils chemist; Mr. and Mrs. Bryant Behrman and sons of Albany. He is Pletweet County Supervisor in that area. Mr. Behrman's parents from Mesa, Arizona, were also present. Mr. and Mrs. Kermit Smith and daughter of Los Angeles where Kermit is a doctorate student in the Spanish department of U. C. L. A.; Mr. and Mrs. Harold Smith of Anaheim, California and their daughter, Hal teaches school there.

Mr. and Mrs. Wm. Somerville of Estacada and their children, Mr. Somerville is at present logging in Idaho. Mr. and Mrs. De Smith and children who recently returned from Provo, Utah, where De completed his teachers training at the Brigham Young University. De will teach in the Seattle School District this fall.

Various family activities were enjoyed by the group during the week and many friends and associates joined in to make the family reunion and missionary farewell a happy event.

Florence Lamb has been under the doctor's care the past week with a throat infection. She was some better Tuesday.

Mr. and Mrs. Doyle Carter and children and Mr. and Mrs. O. Walters are at Long Beach camp.

## Estacada Schools Open Tues. Sept. 2

The Estacada Grade and Estacada Union High School will open Tuesday, September 2 at 9 A.M. Any child who will reach his sixth birthday on or before November 15th is eligible to start school. School buses will make their usual routes Tuesday morning. Any changes in routes will be worked out the first week. The buses will pick up students along the routes between 7:45 and 8:15 and will return the children after 1:15 the first day. The grade school cafeteria will start serving hot lunches Tuesday, the first day of school. Hot lunches will cost 25c at the grade school. Following is a list of items by grades that grade pupils should have:

First Grade—1 wide lined primary pencil tablet; 2 soft No. 2 lead pencils; 1 large eraser; 1 box large crayolas No. 80; 1 box Kleenex; one 12 inch ruler; name on all supplies, coats, hats, sweaters, etc.

Second Grade—Same as first grade plus a pair of small sharp pointed scissors; 1 box No. 16 crayolas.

Third Grade—Same as second grade plus 1 pair of tennis or gym shoes; 50c for "My Weekly Reader."

Fourth Grade—50c for "My Weekly Reader," tennis shoes, ruler, eraser, 2 pencils, pencil tablet, spelling tablet, crayolas, 1 pair sweat sox.

Fifth Grade—2 pencils, 1 spiral note book and paper, 1 box crayolas, 1 ball point pen, 1 spelling tablet, 1 pencil tablet, 1 pair scissors, eraser, 1 ruler for "Newstime"

Sixth Grade—2 pencils, 1 spiral note book and paper, 1 box crayolas, ruler, scissors, eraser, 50c for "Keyboard Jr." 1 box watercolors, ball point pen.

Seventh Grade—Same as sixth plus 50c for "Current Events"

Eighth Grade—50c for "Read Magazine" 2 pencils, protractor, ruler, notebook and paper, compass, crayons, water colors for girls only.

All fifth graders through the eighth grade should have the following for physical education:

Girls—1 pair tennis shoes; gym shorts, blouse, towel, 50c for ice. All items should be marked with student's name.

Boys—1 pair tennis shoes, gym shorts, 2 shirts, 2 pair sweat sox, athletic supporter, towel. All items should be marked with student's name.

Rev. Milton Nelson, visited at the Methodist parsonage on Saturday and Sunday. Mrs. Nelson lives in Seattle and is attending the University of Washington and is part time secretary at the Green Lake Methodist Church.

Mr. and Mrs. Jiggs Pedersen and Mr. and Mrs. Earl McConnell attended the McConnell family reunion at the home of Mrs. Behrens in Portland on Sunday. All of the Earl McConnell family was present. Altogether there were 48 who attended.

## Logging Shutdown Hampers Veneer Plant Opening

Mrs. Russell Nelson, mother of the logging shut-down, has reported the opening of the Estacada Veneer plant. Mrs. Nelson said that the plant is now open and that the logging operation is a work of days.

Over 100 work applications have been received to date, with an ample number of applicants for the 20 to 25 jobs to be filled.

## MRS. KROEGER MEMBER REGISTRY DOCTOR'S NURSES

Marianna Florida- Marguerite Kroeger of Estacada, having fulfilled the requirements, has been chosen a member of the American Registry of Doctor's Nurses and is entitled to all the rights pertaining thereto.

Mrs. Kroeger is employed by Dr. Allyn M. Price.

Purpose of the American Registry of Doctor's Nurses is to bring to the woman who has made a career of nursing for a doctor, an association which is interested in advancing the statistics and enjoy the benefits of the Registry.

Mrs. Kroeger was presented with a certificate and an official pin which distinguishes her as a qualified individual.

## DEETZ GETS MORE THAN ENOUGH SIGNATURES

Despite pessimistic reports that Elmer Deetz, Canby's candidate for the state senate was short of signatures on his nominating petitions, he has come through with flying colors, which will assure him of his name on the ballot as candidate for the state senate as an independent from Clackamas county.

Mr. Deetz says "I am grateful for the fine support shown me after the challenge of obtaining 2500 signatures rather than the 1371 I originally thought I needed."

"As long as the people support me, I will work vigorously for all the people to make this state a better place to live. I live to let other people live better and prosper."

He wishes his supporters to know that mere words cannot express his appreciation to the many people and friends who gave so graciously of their time and support, thus making it possible for him to get the required amount of signatures to place his name on the ballot for the November election.

The Everett Osbornes made a 700 mile trip on Tuesday, Wednesday and Thursday of last week. They drove to Port Angeles, Hoods Canal, Long Beach, Wash. and crossed the ferry at Astoria and went to Seaside for a short stay.
