"Pontiac with wide-track wheels is the best combination of ride... handling... performance and styling of any '59 car" —The Editors of Motor Trend Magazine

In making its annual automotive award, the staff of Motor Trend Magazine, leading automotive publication, tests and evaluates all new cars. Here are quotations from the April 1959 issue:

"The stability of the 1959 Pontiac is the outstanding automotive advance of the year. Everyone considering a new car should experience it."

"It's the best balanced passenger car in America. We firmly believe that in moving the wheels farther apart, to develop the widest stance of any American car, Pontiac has created an entirely new sense of balance and handling security."

"Pontiac's lines are clean, simple and beautiful. It has a fleet look, a trim appearance. The wide wheel design contributes greatly to its

over-all integrated styling. Any comparison with narrower track cars readily shows the difference."

"For the economy-minded, an efficient new engine. The new 420E Tempest economy engine offers remarkable performance along with exceptionally high mileage while operating on regular grade gasoline."

"Pontiac is again tops in performance, based on our extensive road testing. Acceleration is outstanding, yet the engine is unusually quiet and smooth."

Your nearest Pontiac dealer will be glad to let you road-test this award-winning automobile on your own. You'll see why it's the year's most talked-about car!

**THE ONLY CAR WITH WIDE-TRACK WHEELS**

Wheels are five inches farther apart. This widens only the stance, not the car. Pontiac takes a better grip on the road, hugs tighter on curves and corners. Sway and lean disappear, ride is smoother, balanced, steadier. Handling is easier. You drive with a new confidence, a comforting security. Pontiac gives you roadability no "narrow gauge" car can offer.
