### THEIR THEME PEACE

CONFERENCE ON INTERNATIONAL AR BITRATION TO BE HELD."

Will Be Hold In April - Many Cities Have Indorsed the Scheme - Hembers of Congress Are In Favor of the Idea. The Plan Proposed Washington the Place. An interesting meeting was held recently in Washington of the committee appointed lately to co-operate with sim-

treaty of arbitration between Great Britain and the United States. This plan, inaugurated, by members of the New York chamber of commerce has met with much favor. Committees have been organized in Chicago and New York, and it is proposed to take like action in Boston and Philadelphia and elsewhere as soon as possible, Eventually it is hoped the system of arbitration proposed may be extended to all the civilized nations, as well as

ilar committees in other cities in fur-

therance of the plan for a permanent

There was an interesting general discussion of the mode of procedure and the scope of the plan of arbitration, in which men of the wide experience it diplomatic affairs of Mr. J. W. Foster and Mr. John A. Kasson were able to

make many valuable suggestions. It is proposed to have a conference in from each of the states and territories, has been in consultation with members of congress, with a view of ascertaining the most available men for delegates in each section. He spoke of having received very hearty encouragement from members of congress whom he had met. The arrangements will be in charge of

The meeting was most satisfactory in showing that the co-operative movement

the city of Washington.

executive committees of five from each

local committee, and at the conference

In the course of the meeting Dr. Chamberlin gave an intelligent exposition of the plan and progress of the movement. He said in this connection: The spontaneous, independent move ments in Chicago, Philadelphia, Baltimore, New York and other places in the interests of a permanent provision for some wise methods of arbitration between the United States and Great Britain have now become one enthusiastic movement in favor of a national conference. The purpose of the conference is both patriotic and philanthropic. It is clearly understood that there are questions, such as those of national sovereignty and the integrity of the national domain, which no state will consent to arbitrate, but for the great class of disagreements which are debatable, and which the usual methods of diplomacy fail to adjust, there well may be a resort to an arbitrating tribunal intend of the waste and bitterness of war.

It would appear, moreover, that a noble step in the advance of civilization would be taken, should there be between the two great nations which are akin in language, jurisprudence, legal methods and essential love of right a treaty of arbitration, designating the class of issues to be referred and determining certain methods of procedure in constituting and convening the tribunal, as well as certain essential rules gov-FRAZER AXLE erning the presentation of evidence. There would thus be a presumption and practical facility favorable to arbi-Its wearing qualities are unsurpassed, actually tration such as do not now exist and utlasting two boxes of any other brand. Fleet have not hereafore existed. The effect would certainly be on the side of convicts. peace with honor and justice with good

> It is not too much to say that such s treaty or convention between this country and Great Britain would tend toward the adoption of international arbitration throughout the civilized world. -Washington Star.

"Oh, isn't be just too sweet!" sighed a gentle voice in the gallery, and then she and her friend fastened their lorgnettes on Mr. Foote of New York, who was propped in picturesque attitude its usual studied confusion and the carnation of deepest scarlet in his lape setting off his style of beauty quite effectively. If the feminine voter is to count, Mr. Foote would probably take the medal as the handsomest man in BIAS the bouse. - Washington Star.

Gladness Comes

With a better understanding of the With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative. Syrap of Figs. promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its bene-ficial effects, to note when you pur-

ficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely and and gives most general satisfaction.

BURE CURE FOR PILES

#### BURIAL MACHINE.

An Invention intended to Prevent Ac-

A contrivance for lowering coffins into graves is being experimented with in New York at present, and for which a patent has been granted. The inventor is a woman, who was led to design the affair on account of an acciden that happened at the death of a dear friend. Many undertakers throughout the country have placed orders for the ically, and enables a man of very slight

AUTOMATIC BURIAL INVENTION.

stature to bury a very heavy coffin whin The region is called by the Indians The chief of the case. It is meant to do away with the "Roraima," but the several isolated Washington says: Washington in April, at which delegates grewsome association of scenes of

The apparatus consists of a wooden present. Dr. Chamberlin of New York | frame about six inches square, which fits exactly on the head of the grave, piece of mechanism with an arrange ment of cogs and pulleys which are worked by hydraulic power. The machine is operated by means of a bydraulic cylinder, filled with chemically pure glycerine, a non-freezing com pound, and requires no refilling for a either of steel or of bronze. This insures lightness and durability.

the framework. These straps will near is known. a weight of 2,000 pounds, so that no accident from breakage can possibly occur. At a given signal the operator places his foot on a treadle, as shown in the illustration, and the coffin is lowered into the grave, without lar or stoppage.

The speed can be regulated at will. and while its descent can be made in twenty five seconds, it may be regulated so as to take a minute or more. When the coffin has settled at the bottom, a pull at the cords attached to the strap books releases them, and the straps are worked back on their rollers. by means of a lever. During all this time the frame remains closed. No machinery is seen in operation. The frame is removed after the grave has been closed.

### NOVEL HEADACHE CURE.

Which Proves That It's an Ill Wind That

The latest "cure" suggested for the relief of headache is a liair cut. A certain physician in London has met with great success lately in his treatment of persistent cases of "nervous" headaches, and he has finally disclosed the secret.

In each case, he says, after the patient had laid bare a long tale of woe--of sleepless nights and miserable days—he prescribed, briefly, a simple harr cut. It ole cropped off short, after the fashion of

The curative property of the treatment is based on the fact that the tube which is contained in each single hair is sever ed in the process, and the brain "bleeds," as the barbers say, thereby opening a safety valve for the congested cranium. A commentator in the London society press, in referring to this cure,

"Try the cure when next attacked by beadache, and if the result be not satisfactory rest assured that it is not the fault of the prescription, but that the head is so wooden that it 'wooden't' act.'

WITHOUT ICE.

This Inventor Has a New Process For Shipping Meat Around the World. Contracts were drawn up at Chicagrecently by means of which it is prom ised that packers and shippers of perish able food products will in future get along without ice.

Dr. A. T. Perkins, now a resident of Chicago, has patented a process of keeping meats, fruits and perishable prod ucts during transportation by the use of sterilized air. His patents extend to the antipedes. The contract was between him and J. M. Smart of Melbourne manager of the Australian Meat Trans portation corporation, limited, for the ase of the process in the seven colonies of Australia.

A corporation is also about to be formed, with headquarters in Chicago, to control the process over the railroad lines of this continent and the steam ship lines running from the ports of North and South America.

The Repeater's Charitable Motive "I am certain," said the election manager, "that you voted in another

ward early this morning." "How come you ter think so, colonel?" "Because I saw you."

"You's sho' er dat?" "Quite sure."
"Well, colonel, ter tell de truth, I did ote in de Fust wa'd, but I only done it out er charity.'

"Yes, suh. You see, hit waz die way, colonel: De man what keeps de polls had done bin dar sence daylight, en business wuz so slow, en he look so lonesome dat I des give him one vote ter start de ball a-rollin, dat's all."—Chicago Times-

Herald.

Used to Them. Henpeck—Have you "Mrs. Candle's Curtain Lectures" or some other book of

that sort? Bookseller-I'll see, sir, "I wish you would, for I want to get good night's rest."
"What has that to do with it?"
