THE MAN WITH A HOE

Kill Him, but Tomorrow There Will lie Two of Them. An incident of the cattle boom of afteen years ago that is illustrative of

the spirit of the times was the \$5,000 banquet at Dallas, Texas, at which 500 of the cattle barons were entertained. Everything was of the best, says the tiner. The champague was from the vine-clad hills of France, the fruit from the valleys of California. The cattle owners lauded and complimented each other, orated about their successes and specied at the Legislature and the National Land Commission. Especially did the newspapers, which had critised their highhanded usurpation of the lands needed for agriculture, come in for criticism, and at last the only newspaper man present was called on for a speech in reply. A Governor of the Lone Star State, who had once said that the State did not want immigration was tonstmaster and he prefaced his introduction of the journalist with some slighting remarks regarding the press. Angry at the light in which he had been placed the newspaper man

replied: "Gentlemen: You may sneer at the settler whom you call a 'Nester' and, may consider yourselves safe from all injury at his hands, but let me tell you, you are not. A man with a hoe has poked his head over your barbed wire fences. You may kill him, but to-morrow there will be two of them, and next day four or eight. Land that will produce \$20 worth of wheat cannot be kept for the pasturage of a \$5 cow. In a few years the man with a hoe will have you on the run."

The cattlemen laughed and considered it a fair hit, but they did not think the speaker meant it or that he told the truth. But he did, and his prophecy came true. No other such banquet was ever held. The "man with a boe" carried a pair of nippers in his pocket and with them he cut the strands of fence with which the great cattle ranges were inclosed. The cowboys could not prevent him, and the laws could not keen him out. All over the great ranges of the far West, where, sentry, like, the herders rode through long days and nights, are now farms, homes and villages.

One of the stories regarding the reckless extravagance of the cartle owners is that told by Col. John Brittan, a Texas capitalist and officeholder in the old days. He had come up the traff to Abilene, Kan., and was gazing on the wonders of a typical cattle town, where the cowboy was getting rid of his year's earnings in a single night and having what he designated as a royal time. Two cattlemen had returned from New York, where they had been living off the fat of the land and loading themselves down with brie-a-brae and good whisky. "Jim." said John, "that's mighty fine

watch you have there." "Yes," replied the other. "I got the ticker at one of the biggest stores in New York. It cost me a lot of money."
"I've got a finer one," said John calmly pulling an inlaid chronon eter from

"I guess not. What did it cost?" "Paid \$325 for her, spot cash. What dld yours cost?"

Cost me \$375," said the other gracfully, as be put the timepiece back in

his pocket.
His friend was much chagrined at being beaten at his own particular game of display, and stood holding the now despised watch in his hand, looking it over and thinking. Bracing up, he finally drawled: "Well there much difference between 'em. I'll bet you a dozen steers that I can throw mine further than you can yours."

Everybody laughed and looked at plied: "I'll just go you one on that." They went into the street, followed

by the crowd, and, taking aim down the street, sent the handsome timepieces spinning, to be smashed into worthlessness on the road. Jim won and went back to the Alamo saloon and set up the drinks. "A few months after," said Brittan, "I saw them again in Abllene. They were so poor that each wore a long-winding Waterbury and hung on to it with both hands for fear it might fall on the floor."

BLUFFED OUT OF A BIG ROLL. Bold Plan of a Robber in Denver to Raise the Wind.

Mr. Moffat is the Denver banker who was robbed of \$21,000 in his private office one day at noon. The robber held a revolver in one hand and a bottle of troglycerin in the other. He requested Mr. Moffat to write a check for \$21. 000 under penalty of being shot and of having his bank building wrecked by the explosion in the bottle. Mr. Moffat is reputed to be worth as many millions as the number of thousands demanded by the robber. He wrote the check. The robber said he would have to trouble Mr. Moffat to go with him into the paying teller's cage and produce the cash; he would take \$20,000

in large bills, and \$1,000 in gold. "If you say one word, or indicate by a look or motion that anything is wrong. I will shoot you and then blow up the bank." Saying which the robber threw a light overcoat over his arm ncealing the revolver he held in his hand, accompanied the bank president into the teller's cage, received the money and returned with Mr. Moffat to the private office. He then repeated his threat to kill the banker and blow up the building if an alarm should be given before he (the robber) was safely outside the bank. He made his escape and has not been captured. The robber's overcoat, revolver and bottle were found in a doorway near the bank building. The revolver was loaded, but a chemical analysis of the contents of the bottle revealed the fact that the finid was not nitroglycerin but sweet

oil.-Pittsburg Dispatch.

A REMARKABLE AND INTEREST. ING CAREER.

A Member of the First Kentucky Battery Who Was in Twenty-Seven Bland Fought Battles.

roju the Capital Journal, Salem, Oregon Salem, Or., can boast of no better known private citizen than Captain William Benson. To the old residents, as well as to the school children, his figure is as familiar as that of Mt. Hood or the state capital.

Captain Benson, of the First Kentucky battery, detached from the 112th Illinois infantry, is now seventy-four years old, and has taken part in twenty-seven hard-fought battles, besides a great many interesting skirmishes. rie is pensioned for injury in the breast, from concussion of a shell, and for a wound in the right shoulder, caused by leaping from a car while being taken as a prisoner from Andersonville to Pine Forest. For the past twenty years he has suffered almost continually from malaria and shortness of breath, and has been afflicted with theumatism in the legs and shoulders to such an extent that he had not seen a well day in all that time. He was also afflicted with constipation and piles. Eighteen years ago Mr. Benson removed from Illinois to Oregon, on ion, walking off proud and erect, with a fresh, firm, vigorous step for a man in Ponce de Leon's fabled Fountain of earth was notherable. Youth.

Captain Benson is not only a here of the Civil War, but a man worth conpart willingly with his interest in all his earthly possessions rather than be placed back in the debilitated condition where he lingered for a score of years.

"I suppose," said he, laughing, "that what you are after is an advertisement for Pink Pills, but I want to say that I am very glad to give you this testimonial, as I am convinced it will relieve a great deal of suffering. if it can become widely known. I am firmly convinced, after an experience of over fifty years with both patent medicines and physicians, that if every family could keep these Pink Pills in the house they would never need a "I have paid out over \$1,000 for doc-

toring with the best pyhsicians at Salem, but not a cent for myself since a year and a half ago. It was then that I first heard of Pink Pills. I got the first box at a drug store, and had not much confidence in them when I began to take them. I took one box before I got much benefit, but by themiddle of the second box the pain in my breast began to disappear, and the rheumatism in my shoulder went away. The shortness of breath was alleviated, and I began to sleep like an infant. For the first time in twenty years I realized the luxury of sound sleep, and my system began to recoperate

"By the end of the third box it had taken away all my rheumatism and stiffness in the muscles and joints, and I began to feel as nimble as a boy, and could do as good a day's work as ever, but for my wounds. I enjoy the best health I ever enjoyed in my life. My natural weight increased from ten to twenty pounds. My flesh is solid and my skin is as clean and fresh as a baby's. I had tried every remedy under the sun for piles, but without re-lief. At times they were near killing Sciatica rheumatism had laid me up in bed for months at a time. Pink Pills have cured all these things, and I have not felt an indication of piles or rheumatism for eight months. People who see me now can not believe that I am the same man. My face looked drawn, my eyes were bloodshot, my skin was scurvied, and I could not have

had a worse appearance if I had un-

dergone starvation on an artic expedi-

tion. I can now eat whatever I have

relish for, and all I want of it, and it don't hurt me. "I used to be constipated contingally, and I have taken wheelbarrow loads of other pills, but never got perfect relief until I tried Pink Pills. I am now taking two pills a week, and sometimes I go without them for a month, and, as I said, I enjoy continuous good bealth. I have got rid of rheumatism and everything else. Pink Pills perform wonders. They go to work and fix up the kidneys and back and the whole system Three days after first taking them you feel the effect all over. The worst trouble with me was, I had got so 1 could not remember anything. My mind was clouded. A month after I began taking Pink Pills I first began to notice my mind become clear and active, and my memory is perfectly restored, a the pressure of the compressed air, happy change from the feeling of stu-which nots to operate a valve cutting happy change from the feeling of stu-pidity I had suffered. This medicine par fixed me up and made a new man are also le of me. It is only the other day that Dr. Reynolds, Dean of the Salem Medical College, remarked to me that I was looking hale and hearty. I said Pink Pills that have done it. He poohooed at it. But I know what I am talking about, and he had to admit what I said."

(Signed) Wm. Benson.

State of Oregon, American County, Subscribed and sworn to before me this 20th day of November, 1895. E. Hofer, Notary Public,

In and for the state of Oregon. Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia. partial paralysis, St. Vitus' dance, partial paralysis, St. Vitus cance, soiatica, mearalgia, rheumatism, nervous headsche, the after effect of la grippe, palpitation of the heart, pale and sallow compexions, all forms of weakness either in male or female. Pink Pills are sold by all dealers, or will be sent postpaid on remain of price 80 cents a box, or six to see for \$2.5 (they are never sold in bulk or by the 100), by addressing Dr Williams Medicine Company, Schenectady, N. Y.

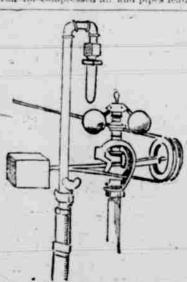

Speed of Electric Lacomotives Apropos of the shipment of the last operation of the frains in the Belt Line tunnel at Baltimore is the statement made by the designers, the General Electric Company, that with these hour has been attained without effort, and that they could as easily make 150 miles an hour as a steam locomotive; makes 60. As the electric locomortives have in all respects fulfilled the claims of their designers, there is no reason to disbelieve this statement.

Edison's Record of Patents. Thomas A. Edison has been granted siderable property. He says he would 711 patents duing the last twenty ave years, which beats the record of all times and all countries by a large majority. Eithu Thomson stands No. 2 on the list, with mai; Francis H. Richards is third, with 343; Edward Weston, 274; Charles E. Seribner, 248; Charles J. Vanderpoole, with 244; Randolph M. Hunter, with 228 and George Westinghouse, with 217. Seventeen other gentlemen have reserved more than 100 patents during the twenty-five years ended with 1805. Connecticut patents more inventions than any other State in proportion to its population. The District of Columbia comes se Then come Massachusetts, Rhode Island, New Jersey, New York, Montana and Colorado. The inventive genius is least developed in Mississippi, South Carolina, North Carolina, Alabama, Georgia and Arkansas, where comparatively few patents have been applied

An automatic safety device for ennes or other machinery which instantly stops them on their attaining an excessive speed, has been adopted by the North Hudson Railroad Company, The device is the invention of their chief engineer, T. A. Bonta. The apparatus consists of an air-pump, a small reser voir for compressed air and pipes lead-

AUTOMATIC SAFETY DEVICE.

ing to the various pieces of apparatus to be controlled, and to places from which it is desired to shut the machin-The air-pump automatically stops when it has produced in the system the desired pressure. The automatic device consists of an auxiliary governor beited to the engine shaft, and a brass pipe, working in a stuffing box so as to be easily adjusted to any height . This pipe is closed at the end by a small glass tube, like an ordinary test tube, but much thinner than the or dinary tubes. The movable brass U-tube is adjusted so as to carry the glass end a very short distance above the normal position to which the governor balls revolve. Any dangerous increase in speed will lift the balls, thus breaking the glass tube and relieving off the supply of steam. These tubes ated on each side of the main belt and above the belt, so that in case of the raising of a lap of the belt it will break one of the tubes and thus stop the engine, or if the belt should slip Yes, and no thanks to you doctors. It is off sideways the same result would be produced -Philadelphia Record.

The British army officials have had an tice and testing grounds, at Lydd, for the purpose of working a search light to be used during the heavy gun practice at various objects during the night. This will, of course, afford an ideal practice.

One of the newest developments of the practical applications of the electric current is in the production of the characteristic effects produced by massage. By suitably applying the different forms distinguished artists. of electric current muscular stimulation

That the electric launch is making progress in England is illustrated by report that at one place the local tric light company has run a cable to the water's edge to provide suitable mouth harbor, steaming ten knots an means for readily recharging the storage batteries employed in these

miautes for each passenger is effected. According to the passenger traffic of that city, this makes an economy of time is money and one day's labor is worth \$1, the electric cars are saving the city \$1,250,000 a year in time.

ALASKA'S HUMAN BIRDS.

Strange Roce Who Chatter and Chierap

People who talk like birds, who whistle and chirrup in their speech, with notes varying from those of the wren to the harsh guttural of the ceckstop a tribe of such people has actubeen discovered by Dr. Franz

I've was the first white man to locate these chirruping savages, which he did of the three electrolocomotives for the linear the boundary between Alaska and British Columbia, though many travelers have heard them spoken of by other Indians. Once a tribe of some importance, only about twelve indilocomotives a specific eighty miles an viduals now survive, and they are perpetual fugitives hunted like wild benals, in fact, and possessing no perminnept homes. It has long been a practice among

the coast Indians of Alaska, when a chief died, to go and kill a few of the Tsulsowt as the people who talk like birds are called the object being that the chief might have servants to wait on him while on his way to the aborig-Tsutsowt, and the latter during the mouths of their holes, whistling shrilly. The Tsutsowt capture them by means of "dead-fall" traps set at the hole mouth.

Dr. Boaz had much trouble in finding these people owing to their mode of life. At length he came upon a Tsutsowt boy, and, obtaining his confidence, was introduced to other members of the tribe. The bird-like language of which he had heard so much appeared to owe its peculiarity to an extraordinary richness in sibilant and guttural sounds. When spoken it had actually a remarkable likeness to the chirruping of birds.

The Tsutsowt tribe formerly con-

sisted of two claus, and among them the common aboriginal law against marriage within the clan was rigidly enforced. That is to say, no maiden could take a husband from her own clan, or vice versa. But now one of the clans has been wholly wiped out, not a single member surviving, and on this account the men has taken wives within the last few years from the Nass River Indians of Northern British Columbia. Once a year they come down from the mountains and spend a fortnight with the Nass River people, in order to see their wives' folks. It is an odd fact that the Tsutswot are hunters exclusively, whereas all other tribes in their region are fishermen.

Railway Incident.

Prof. Lincoln, of Brown University, who died a few years ago, used often to relate with give a railroad adventure which he had in Germany during his last European tour. The party was traveling in one of the little German rallway carriages with the doors at the sides when the train stopped at a sta-

tion where there was a restaurant. walt a few minutes, and so, with American independence, Prof. Lincoln and another member of the party stepped out, crossed another track, and proceeded to the station.

This infraction of German regulations was at first unnoticed, but on the return an obstacle was found in the shape of another train between them and their car.

The various railway personages appeared stolldly ignorant as to time tables. The train was too long to go around; the cars were unprovided with our convenient end platforms and steps, and the space beneath them was none too ample for a cat to go under; only one course remained-that was to go over the train.

This seemed a simple matter, as the German cars are very small affairs compared with our own, and moreover are provided with a convenient ladder on each wide for the use of the man who climbs up and puts the lamps down through a hole in the roof.

Accordingly the start was made, and the feat was about half-accomplished before it was noticed by the railway officials. Then began a great comm tion, with violent gesticulations and

commands to come down. But by dint of Prof. Lincoln's vociferations in German to the officials to the effect that coming down on the farther side was just as well as to return to the station, and of sotto voce hints in New England vernacular to his comrade to keep on going, the retreat was successfully covered and the railway carriage safely gained just in time.

Is it possible that the album craze is about to revive? Thirty years ago no young lady was without her prettily bound volume, in which she tensed and coaxed her friends to make all sorts of absurd confessions as to their favorite flowers, food, occupation and what not. Or, did she aspire to higher, electric light plant installed at the practibings, she would get them to inscribe a couplet or a rhyme. We hope that the fashion is not going to revive, for it became a nuisance, but for all that, Princess Henrietta of Belgium, now duchess of Vendome, received among her other beautiful wedding gifts an album in which the leading literary men of Belgium had inscribed their ideas in verse and prose. Suitable il-lustrations were contributed by various
