It has been urged that an open season of only a month would make the birds more plentiful and that some such relief is needed as they are kept down too close now.

The Public School.

The attendance at the Public School is constantly increasing, and by the end of the month the school will probably have something near its usual membership. The recent rains will probably cause some to return from the hop fields. While it may seem to some that it was a mistake to begin the school so early, yet when we consider that the district voted for nine months' school, and that there is usually some time lost during the winter months on account of sickness and bad weather it would carry the school very late in the summer if a later date had been chosen. This would work as great an injustice to a certain class of pupils as beginning so early does to those who desire to pick hops. Besides we don't believe in hop picking regulating the opening of district schools.
