ar beets to feed to stock, espeto milch cows. I feed about four of beets, chopped up, with three cornmeal and one pine of cotmeal for morning ration; at substitute mixed feeds, for the roots. I like a change in s, giving one morning beets, xt carrots, and then potatoes, as them to spare. I think stock lange in their diet as well as There is a very perceptible fallin the flow of milk as soon as I ding roots.-Heard's Dairymar,

Rational Pig Feeding. ul experiments have shown that ral feeding of foods rich in pro- first consideration.

tein-which is the so-called flesh-forming matter of the food-greatly increases the growth of pigs. The reason for this is quite evident and simple. It is that this food so encourages the devel- of them are actually poisonous." opment of muscular tissue, of which the vital organs mostly consist, that the digestion and assimilation of the food are made much easier and effective; that the food is eaten with better appetite, and is far better digested. In fact, the machinery of the pig is so much improved by this feeding that its work is done much more effectively and consequently so much more profitably.-Agriculturist.

To Make the Farm Pay.

One of the greatest hindrances to profitable farming is a desire to go too fast at first and to purchase things we could get along without. The obliging agents tell you that you need not trouble about the money; your note will do just as well; but you will find that you must pay big interest for the priviege of going in debt, and you are always at a disadvantage to your creditor. Have the money ready to pay, and you can then make your half of the bargain. Take good care of your farm and your stock, and they will furnish the money for necessary outlays.

I will just say to young men who expect to make farming their occupation, that they may expect hard work and plenty of it, and will not need to join any base-ball nine for exercise; but if they take care of their health and habits it will not hurt them, for I have tried it for over sixty years, and am today a well-preserved man. I can truly say that with the blessing of our Heavenly Father upon the labors of myself and family I have made farming pay .-New York Tribune.

How to Draw a Stump. My experience has taught me that for those using capstan grub and stump machines or otherwise pulling in a

TO PROPERLY DRAW A STUMP.

horizontal direction, it is advisable to islands round its coast. hitch to the stump in the manner illustrated. If the chain is fastened to a large side root or to a large root at the side nearest the machine, double as much power is required as if it were hitched on the opposite side and the chain passed over the stump, either if hitched to a root and passed over, or when hitched to the further side of a high stump near the top and passed over.-Egbert Boukma, Kent County.

Locating the Pear Orchard.

A slightly descending slope is most favorable in order to precipitate drainage and the discharge of surplus surface water, but it is not essential that any particular point of the compass should be secured. Shelter from the rake of the wind is important. The pear is a companionable tree and will luxuriate when supported by other trees around it. In close garden culture a degree of humidity is preserved and there is less evaporation from the foliage where the strong winds are broken, the growth will be more vigorous and healthy. There must, however, be sufficient air and sunlight to mature the wood and the fruit. If the site is high, it will be an advantage to plant s, and the attacks of owls and an evergreen to the windward, both for that would especially trouble the health of the trees and also to prevent the falling of the fruit during tached to the side of a building high winds. On the other hand, a low, on in the illustration. It is easy cold and peaty position, subject to fogs to can be taken down in the fall, and frosty nights, is objectionable. A strong, retentive loam inclining to clay is a preferable soil.

> The Right Way to Feed Horses. The receptacle for the horse's grain should never be made of wood, but always of iron, which is easily kept clean and sweet. A few handfuls of dry neal added to each feed of oats will cause the horse to eat much slower, chew his food more perfectly, and thereby be kept in more perfect condition, thorough mastication being necessary to good digestion. If the weather is celd, let the meal be largely of corn, increasing the amount of fine feed, as shorts, as the weather becomes warm, with a little oil cake toward spring .-Our Animal Friends.

When heavy falls of snow come get out the snow plow and open the paths before the snow crusts over. It will save labor to open the roads at once. A foot-wide hemlock plank, sixteen feet in length and two inches in thickness, cut in half and nailed together V-shaped, will make a first-class plow.

Pruning Grape Vines, It is all right to prune grape vines in early winter. It gives the trellises a neater appearance to have the brush removed and the canes tied up. There will be other things to look after in early spring.-Epitomist.

The Dairy. Washing out the buttermilk is much more economical of labor than working

it out.

All reasonable care should be taken to prevent the cows from drinking stagnant water.

Brine salting of butter is wasteful and inaccurate. The most satisfactory way is to salt on the butter worker, weighing both salt and butter.

The power to consume, digest and assimilate nutritious food is what is desired of the cow at maturity; and to receive this, the calf must be well fed. No other matter about the farm will so I oorly stand being made a thing of secondary interest as the dairy. very little neglect will go a long way toward destroying the profit. Neglect

is sure to attend that which is not of

Determined women have invaded another educational citadel. The university of Edinburgh has granted the degree of M. A. to Misses Geddes and

THE MEANING OF IT.

Very often we give the wrong meaning to word and thereby make serious mistakes For instance, the true and literal meaning of the word rheumatism is "aches or painr of the muscles, bones and joints of the huof the muscles, bones and joints of the human body." It is general and not specific
Also the word relief does not mean cure
Relief may be but a short cessation of pain
But when we say St. Jacobs Oil cures rheumatism promptly and permanently, we
mean it conquers pain quickly with no return of it, unless the sufferer gives cause
for a new attack, and then it will cure
again. It matters not whether it is chronic,
acute or in-ammatory, it will cure. That
is sure, be sure of it.

There is a house in Paris occupied by over fifty tenants who for twenty years have never paid any rent, the landlord being unknown.

TO GET OUT OF THE WAY

When trouble is coming, is obviously the part of common sense. An obstruction of the bowels is a serious obstacle to health. To get this out of the way is an easy matter with the thorough laxative, Hostetter's Stomach Bitters, which, although it affords relief, never gripes and convulses like a drastic purgative. Dyspepsia, malatria, kidney and rheumatic allineits and nervousness yield to this genial family medicine.

America has over five thousand

I shall recommend Piso's Cure for Consumption far and wide.—Mrs. Mulligan, Plumstead, Kent, England, Nov. 8, 1895.

Gladness Comes

With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disconsistency but imply to a continued condisickness are not due to any actual dis-ease, but simply to a constipated condi-tion of the system, which the pleasant family laxative, Syrup of Figs, prompt-ly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the gans on which it acts. It is the all important, in order to get its bene-ficial effects, to note when you pur-chase, that you have the genuine arti-cle, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health,

and the system is regular, laxatives or other remedles are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely Led and gives most general satisfaction.

Some very large trees bear very little fruit.

Winking at sin will soon ruin the eye-sight. A wolf in sheep's clothing

s none the less a wolf The rest of Christ is for all who will give up sin.

Every temptation resisted is a trouble escaped. Nothing is gained by starving the

soul to feed the body. No man who truly follows Christ

ever has to stand alone Every man helps the devil who talks

one way and lives another. When you pray don't forget those

who treat you despitefully. The best news ever told in this world was that God is love.

Too many start to follow Christ who stop at the first cross-roads.

The man who lives a ite has a pack of bloodhounds on his track. The best place for a Christian is where God needs him most.

Be careful where you step, and those who follow you will stumble less. God has called many men to preach

the gospel, but none to defend it. Sooner or later every great thought

will make its way around the world. Improve your time, and you can dapend upon it that time will improve

There is such a thing as having religion in the head and not in the heart.

Try giving all your troubles to the Lord, and see how light they will be-

God expects every Christian to try to make the world better than he found it.

Every one who can say, "The Lord is my Shepherd," may also say, "I shall not want."

If wisdom could have saved the world it would have been done in the

The light shining out of a true Christian life is the best answer that can be given to unbelief. Whenever the devil is called by his

right name some prominent men are sure to be offended.

Before you put in a crop of wild oats remember that you will have to reap what you sow.

How His Knowledge Served Him. in a recent conversation with a reporter of the New York Sun, the Hon. Daniel S. Lamont, Secretary of War, remarked that he had learned telegraphy as a boy, and that it had often stood him in good stead. He then told the following story illustrating this use-

Several years ago, after my father's death, I wanted to bring my mother to Washington. I was in McGrawville, my home town in Cortland County, and it was necessary for us to take a number of railroads in order to reach the main line by which we were to go to Washington. It was also necessary to change cars a number of times on these local roads, and in one or two instances the trains were late, so that I

connection. At last it became positively known to me that unless we could make a certain connection, my mother would be compelled to remain over Sunday in a small and cheerless town. I wnew the president of a railroad, who, if he were informed of my predicament, 1 lieved would help me out. So I tele-graphed him, telling him that my trains were late, and asked him if he would not telegraph the superintendent to have the train on the main road held until my local train arrived.

Before I got to the local station where the main line train was to be met, I had to change cars. It was a dreary little station, and I remember well my anxiety while sitting in the waiting-room with my mother, not knowing whether my dispatch had been received, till I heard clicking over the wire an inquiry from the superintendent of the road:

"Is Colonel Lamont there?"

The operator looked around the room see only two persons, my mother and myself, and immediately replied:

Just as he sent that word I stepped up and said:

"My friend, I have unintentionally overheard the inquiry going over your line as to whether Colonel Lamont is here. That is my name."

The operator quickly corrected his "no," and informed the superintendent that I was there, and word came back that the main line train would be held for me. This is only a little incident, but it

demonstrates not only the value of telegraphy, but the possible usefulness of all practical knowledge that a boy can obtain. So I say that every boy who has the opportunity to learn telegraphy should do so. Once learned, you never forget it. It may be of service at any time, and it will always give a good livelihood.

Might Be Worse. Howso-A horse ran away with my brother yesierday and he'll be laid up
