Opposite Railway Station Forest Grove

A special school meeting will be held in Forest Grove Saturday to again consider the purchase of the land south of the public school to the street. The previous adverse vote was largely a mark of disapproval of the plan to again use for school purposes the old creamery building which was a school room 35 years ago. The land without the building is desirable and worth the price asked. But no more old buildings are wanted. The district can bond for \$10,000 without exceeding the 5 per cent limit, getting the money at 4 per cent, and as under this new law it will not be necessary hereafter to levy more than a 2½ mill tax to support the school, the county and state giving after this year about \$7.75 for each child of school age, a yearly tax of 5 mills, still making one-fourth

less than the present tax levy, would in the 20 years of the bond period wipe out the indebtedness. Ten thousand dollars would make a creditable school-house that would advertise the city as really a city of schools.

I. PUTNAM.
