George Hancock, our popular liveryman, is now considered by his neighbors to be the most hospitable man in town. One day last week a sad mistake was made when he gave his order to the local butcher and that same day there was delivered to George's home enough soup material to make about two barrels of good soup. The butcher would not reduce his order. It was up to George to do something quick. He as once took charge of the family kitchen, manufactured the soup de boullion, then sent criers to the high places and hedges for his friends to come. They came, partook, of the feed and wondered!—!—!

Delicious Doughnuts.

To make German doughnuts, beat four eggs very light, one pint of sweet milk, one small teaspoonful of lemon extract, a pinch of salt; scald the milk and while hot pour over one pint of sifted flour; beat all very smooth and when the mixture is cool have ready the yolks of the eggs well beaten; add them to the flour and milk, beat them thoroughly and then add the well beaten whites; then add the salt and lastly sufficient flour to make a soft dough; flour your biscuit board and turn the dough on it, roll it in pieces as thick as your finger and form them into rings, fry in boiling fat. This is delicious for breakfast.

Don't Peel Potatoes.

"It is most essential," says Dr. Joseph E. Winters, professor of diseases of children in the Cornell Medical college, "that potatoes, however served, should be cooked in their jackets, for the reason that the outer rind, just under the thin skin, is the richest in potash and constitutes a chief supply of these salts to the body. This portion is sacrificed in peeling."

"As far as practicable vegetables should be steamed instead of boiled, as boiling dissolves the potash salts."

"Fruits should be eaten raw. When cooked the chemical union of salts and vegetable acids is destroyed."
