Catarrh is usually regarded as nothing more serious than a bad cold or slight inflammation of the inner skin and tissues of the head and throat, when it is, in fact, not only a vexatious and troublesome disease, but a complicated and dangerous one. It is true that Catarrh usually begins with a cold in the head, but when the poisons, which are thrown off through the secretions, find their way into the blood, it becomes a constitutional trouble that affects all parts of the body. It has more annoying and disgusting symptoms than any other disease. There is a sickening and offensive discharge from the nostrils, a constant buzzing noise in the ears, headaches and pains up; ut's tolme t' take y'r insomnia will help them in their life work. It also affects the Kidneys, Bladder and other members of the body, while the general health is weakened, appetite lost and the patient feels despondent and half sick all the time. But worst of all, if the trouble is not checked the lungs become diseased from the constant passage of poisoned blood through them, and Catarrh terminates in Consumption, the most fatal of all diseases.
