FACTS THAT TALK

THIS space has been purchased by Pacific University. This same matter will appear in each issue until the expiration of the advertising contract. It is an advertisement that is intended to convey to Washington county citizens a few facts about an educational institution with which they are not unfamiliar. That they, as well as others, may become more familiar with Pacific's present standing, within and without Oregon, illustrated literature, fresh from the press, may be had for the asking. This literature is replete with facts that tell and figures which convince. The articles are written by alumni and students of Pacific. They are all well worth the reading. Those contributed by students set forth present conditions in the institution, and are convincing because they are true. Of special interest are the articles written by alumni, Hon. H. W. Scott, Editor-in-Chief of The Oregonian and Rev. Horace M. Ramsey, Rector of St. Stephen's Church, Portland.

Pacific University has the largest endowment of all the private colleges in the Northwest. In buildings, laboratories and library it is the best equipped Christian college in Oregon. Not only does the amount of its productive funds very far exceed that of any of these institutions in the State, but it is greater than that of all combined. For this reason Pacific has always been able to secure superior instructors and has never had to depend upon the enrollment of students for its income.

Pacific University in the past has been rather conservative in the matter of advertising. And it makes public these statements now, only because there are reasons why it seems advisable. Pacific still adheres to its policy of desiring students rather than numbers; of maintaining creditable scholarship rather than crowded enrollment.
