of good gravel roads. I remember when with the finest schools and colleges.

"Massachusetts spends more money than any other State on her public in the next ten years. New Jersey has ada, has 60,000 miles of good roads, and from that phenomenal improvement have been the results of prosperity to ket. its farmers."-New York Sun.

When the smiles of spring appear, Drag the roads; When the cummer time is here, Drag the roads: When the corn is in the ear: In the winter cold and drear;

Drag the roads! When you've nothing else to do, Drag the roads; If but for an hour or two, Drag the roads. It will keep them good as new. With a purpose firm and true, Fall in line! It's up to you;

Every season in the year;

Drag the roads! Would you do the proper thing? Drag the roads. Set the system on the wing; Drag the roads. Give the drag a lively swing: Toss the laurel wreath to King! Hats off! Everybody sing: Drag the roads

-M. Albertus Coverdell,

The Road Problem. Good roads economize time and force in travel and transportation of pro

ducts. Money expended in building good roads should not be considered as a tax

but as an investment. Good roads mean profit; bad roads mean loss. Good roads possess a money value as surely and certainly as

does any desirable commodity. We do not reckon distances by miles these days, but by hours. Bad roads mean long hours for transportationloss of time. Good roads mean quick transportation-saving of time.

WEALTH IN WEEDS.

Profitable Field Which the American

Among the wild drug plants now rap idly disappearing are seneca snake root and purple coneflower. This drug has come into special prominence in the last few years and is much in demand an increasing foreign consumption be ing noted in addition to the quantity necessary to satisfy home demands

Rabies from Dog's Paw.

The popular notion that rables only follows the bite of a mad animal or, by exception, the licking of a superficial wound is incorrect. P. Remlinger, director of the Imperial Bacteriological institute of Constantinople, has brought forward three observations, which show the possibility of a third method of contamination.

A certain number of animals, particu larly the dog and the cat, have the habit of licking their paws. But Roux and Nocard have shown that the sally: becomes virulent in a few days after the first appearance of the symptoms of rables. When the rabid animal is confined in one place the saftva drips upor the ground and soils his paws, which are also contaminated by licking with his tongue.

Wounds, therefore, made by scratch ing with the claws of a rabid animal are necessarily infected wounds. In scratching the human skin the animal lays bare a number of nerve filaments upon which the virus is deposited. Persons who are scratched by animals thought to be mad should, therefore submit themselves to appropriate treatment without loss of time.-Le Bulletin Medical.

An Afterpiece. Everybody wondered why pretty,

American-born Selma Carlson married Olaf Jonssen, who was only six months out of Sweden, and seemed stupid. But Olaf was steady, thrifty and kindhearted, and made Selma an admirable and easily managed husband.

Sometimes, however, Olaf proved amusing, even to Selma. She tells of one occasion when she sent him with some aching teeth to the dentist.

After the teeth were extracted, Olaf, instead of leaving the office, hung about expectantly. "Is there something more you want

done?" asked the dentist. "Vell, my dunno," returned Olaf, looking doubtfully at the chandeller. 'My tank maybe my like leedle gas. My meests ees tole my my hov to take some for my toots. Eef she don't hart too moch, my tank maybe my better

how about twanty-fi' cent wort." As soon as you eat, it's all over at SCHOOL STUDIES.

I wonder what has become of "Bub' Hinkley. Remember him in the old school days? He simply couldn't learn, He knew more schemes for getting out of work than any fellow you ever saw. He was an expert with the slingshot, bow and arrow, fists, and was the box all-around wrestler in the school. But

One time the teacher, Old Man Bruce, you remember, gave "Bub" one of those examples like this: "A has a piece of land. Half of A's land and 30 acres is twice as much as B's and one-third more than C's. How much land did each have?"

"Bub" worked and perspired over his slate for two solid hours and then gave an awful yell and jumped right out of the window. And we never saw him again, for his folks moved away the next day. I wonder what became of Bub-Legislature or pentitentiary? You never can tell.-Cincinnati Post.

USE OFFICES AS PATTERNS.

Architects Convert Business Plac Into Model Dwellings.

Architects nowadays are cultivating the fashion of impressing their patrons with their taste by having their offices in dwelling houses artistically ornanented. Almost every large firm of architects in New York at present has its headquarters in what were formerly private houses on the cross streets near 5th avenue, says the New York Press, the fronts of which make a particularly attractive spot in an otherwise uninteresting row of houses. have evergreen shrubs in artistic pots before their doors; boxes filled with flowering plants in the windows; the sashes themselves filled with schemes of colored glass set in lead frames, and the doorways simply invite one to go inside.

Of course, a whole house of this kind is expensive, but it gives an air of exclusiveness that is a valuable asset. Besides it enables the architects to "show off" many of their ideas of interior decoration in the general reception room and the room where clients consult the architects them-

One of these general reception rooms is practically two stories high, with a gallery running around the well in the center, on which all sorts of plaster decorations are hung. The private chambers are dreams of soft colors, specially designed furniture and even the heavily shaded electrollers are floors are converted into draughting rooms, and as all of these private houses face north and south they are particularly adapted for this purpose, owing to the abundance of light. But it is the "artistic front" that is counted on to attract the attention, and it

has been found to pay. Women, Is This True!

The heads of business houses say that, while in many respects women work as well an men, they are very hard to discharge-so hard to discharge. Indeed, that some employers, after one experience, refuse to engage another woman.

"A man, discharged," said a department manager, "takes the blow quietly, patiently, courageously. It hurts, but he doesn't show it. With a pale smile, he cleans out his desk, collects his money and departs. So ends the unpleasant episode. "But a woman, when she reads her

note of dismissal, bursts into loud sobs, and rushes at once into the manager's private office. "'Oh, please don't discharge me,' she moans. 'Think of the disgrace.

promise to do better; I will, truly. Can't I have another chance?" "She gets another chance. She could get anything if in return she would cut short this wet and dreary scene. And

she repeats this scene, if, a week or two later, she is discharged again. "Women should learn to take a discharge decently. A discharge is not necessarily a disgrace, and it is always pretty nearly as unpleasant for the discharger as for the dischargee.

Why make it worse?" What a Birdless World Would Be, If the world were birdless, a naturalist declares, man could not inhabit it after nine years' time in spite of all the sprays and poisons that could be manufactured for the destruction of insects. The insects and slugs would simply eat all the orchards and crops in that time.

He Couldn't Tell.

"What do you consider the six best books of the year, Mr. Ego?" asked the

young woman. "Well-er-really," replied Mr. Ego. the novelist, "I've written two books this year, you know."-Philadelphia Ledger.

Some people have a way of their wa when it comes to spelling.
