PROSPECTS GOOD FOR A CANNERY

Abundant Harvest in Washington County.

PROBABLY BUILD NEXT YEAR

Southern Pacific is Aiding the Fruit Industry By Good Transportation.

statements while here that led to the fact that he has favorably reported to his company the enormity of the fruit crop adjacent to Forest Grove and that company is now casting about for more information and will in all probability launch a big cannery here next summer.

Mr. Bussell, one of the members of the firm, will visit Forest Grove as soon after the season's crop is harvested as he can and will meet the farmers of this section with a view to installing a cannery. It will be necessary for them to go into the fruit raising business on a larger scale besides giving the company some assurance that it can expect a large amount of fruit.

A. J. Henneman, buyer for the company, is in the city and is having bought for the company all the fruit that is marketable which insures that the highest price will be paid. Any one having pears, apples or any other fruit should look up the buyers in this city, for the more fruit that is shipped from this point this season just so much brighter are the chances for getting a

Interest in growing small fruits throughout the Willamette Valley and the establishment of canneries to preserve them, is being fostered by the Southern Pacific in Oregon. A cam-next few years. How great the creampaign started by the company for the ery industry is in Oregon is generally growth of the fruit-canning industry in this state promises to bring about the best results. Under the direction of turning the attention of Oregonians to Charles Malboeuf, district freight agent for the Oregon lines, a great industry in the canning of small fruits will be built up in Western Oregon. It is Mr. Malboeuf's plan to make this industry as important in Oregon as fruit growing and preserving in California. This can easily be done, he says, by encouraging the marketing of green fruit and the increase of canneries in

Mr. Malboeuf has attended a number of meetings of fruit-growers in various parts of the Willamette Valley. and his project has been favored. He has promised very favorable freight of the Rod and Gun Club who were goneries, both on green fruit to the can-neries, and from the canneries to the when she asked, "What are you going market. Generous reductions have to shoot?" "Clay birds," came the been made in the tariffs for the benefit answer from Roy Brookings of the of the fruit grower and canner, and Honeyman Hardware Co. during the coming year there will be large tracts throughout the valley I'll bring you some." "How do you planted to small fruits.

'The present season' said Mr Malboeuf, "has been notable for one of each, that's sure." "How do you the biggest crops of berries and chercook them?" "Oh, you can parboil sies on record. Favorable conditions them but they are more palatial on throughout Western Oregon have made toast." And the jovial salesman keting the fruit in Portland.

Realizing the conditions, and with some more crockery." the desire to encourage an industry so cific to aid in every way the introduc- Piano House.

tion of the best varieties ef small fruits, and to assist their cultivation by scientific methods.

This work is bringing results. number of canning establishments will be erected within a short time. At present there are two fruit canneries at Portland, and others at Salem, Springbrook, Eugene and Ashland, and others have been started this year, at Grants Pass, Brownsville, Monmouth and Lebanon. The Salem plant is to be enlarged, the Eugene cannery has been improved, and the arrangements have been made to establish another large cannery at Salem and another at

All sections of the valley are awakening to the possibilities of fruit growitg in connection with the canning industry, and by next spring it is likely that \$500,000 will be invested in canneries throughout Western Oregon.

The output of canned fruits on the Southern Pacific Lines in this state, The prospects for a good sized outside of Portland, during 1906, was cannery here are growing brighter as less than 50 carloads. This year the this year's fruit crop is being harvested. | output is larger and by next year there Some time ago a fruit buyer from the should be nearly 100 carloads for ship-Weber-Bussell Canning Co., Seattle, ment to the Eastern markets. Within the largest on the coast, was here look- the next five years, shipments of ing over the fruit crop with a view of tinned fruits from Western Oregon buying all he could get. He made should amount to a 1000 cars a year. CONTRAST IS STRIKING.

> There is quite a contrast with California on the fruit output. California ships 60,000 cars a year of fruit products, exclusive of wines. Of this amount, 35,000 cars are oranges and lemons, 10,000 cars dried fruits, 8000 egg for our boys and just think it cars green fruit and about 6000 cars canned fruit. A large part of the fruit raised in California is grown with the aid of irrigation. In the Willamette Valley there is no need for irrigation. The best cherries in the world are grown here with scarcely any attention. Berries raised here without irrigation are equal to any grown in any part of country. I am informed on best authority that the California fruit grower realizes much more profit from his canned fruits than from that he dries.

The output of green and dried fruit in the territory served by the Oregon Lines of the Southern Pacific does not exceed 1000 cars a year. With the promotion of the cannery industry and the raising of large amounts of small fruits, this figure will be much increased.

Mr. Malboeuf says the canning industry should equal the creamery business in importance in this state, and he is satisfied it will do so within the known. It is interesting to know that the possibilities of the creamery busiand cream condenser now operating in

The campaign just begun by the Southern Pacific will be carried on energetically throughout the year, and it is hoped to have many more canneries in operation by next summer. - Ore-

BACKING DOWN ON AGREEMENT

No Depot at Banks a Bone of Cortention.

FOR

Merchants Are Hauling Freight From Forest Grove By Far Cheaper.

There is something doing in our The annual meeting of the trustees neighboring city of Banks every minute as will be seen by the loads of at the parsonage Tuesday evening for freight that are hauled to that place the purpose of making the annual re- from the Forest Grove depot. Yes, port to the conference which meets from Forest Grove. That seems strange September 24th, at the Grace M. E. but nevertheless it is the truth. Why church, Portland. The society has do they haul freight from here? Well, made about \$300 worth of improve- it is like this: When the P. R. & N. ments on the parsonage besides im- built its line it was mutually agreed proving the sidewalks. The trustees that that city should have a good depot. are much pleased with the progress of The line is finished that far as we all the church during the past year and know but the depot is not. Mr. Banks, feel that the report to the conference is the father of the town, gave the ground unusually good. A. G. Hoffman was to the company for the purpose of chosen lay delegate and F. M. Starrett constructing a nice depot and as yet there is none. And what is more, they say, there is not likely to be any.

At present, and ever since the road was built for that matter, the merchants have been obliged to rent a barn near by for the purpose of housing their goods while passengers who sought bassage via the P. R. & N. are compelled to stand out in the rain. Besides, claim the merchants, paying double freight rates from Hillsboro, they are compelled to pay rent for a depot, and it has been found by them that it is cheaper to have their freight shipped to this station and hauled to Banks by wagon than under the conditions there as they now exist.

It is understood that the matter will be taken before the Railroad Commission with the hope that matters can be righted.

Unlike the Times of Cleveland.

Something decidedly unusual happened the other day-yes, it was only last week. Uncle Bill Kane was comproperty. Mr. Corl will then begin ing down town wondering who in the the erection of his new brick on the world he could get to put in his wood which he recently had building will contain two rooms, one ophising upon the future and thinking how in the times of the Cleveland badge he could get doodles of men without the asking, when he passed the harness the must leave a blank space for had returned from the hot springs in had a rather peculiar case at Gaston last store of Mr. Bowman, and lo, and belanguage several of the boys used August where he had gone to recuper- Sunday when Mrs. Ralston's cow took hold! there sat four idle men, Henry Hamilton, William Hatfield, Eddie oid past first station, for Rhodes scored meal and likewise on the following polexy.
