"It was all for Mary. Mary is my sister, and she is a cripple. She hasn't had the chance help but love her. Soon after I cam can't get married now

The detective sat there with his face sobbed. Finally be reached out his hand and touched hers and said:

"No one knows it but you and I can be sent to the losers through the mail. As for the money, we will pay it back together, half and half. When we have got it together I will tell you

That's all the reader need know, except that Mary was married six months later and that a mystery greater than the robberies still hangs over the M. QUAD. boarding house.

THE SPEAKER'S MACE.

Origin of the Emd.em of Authority Used In Congress

At the right of the speaker's desk in the hall of the house of represent atives in the capitol at Washington stands a large cylindrical pedestal made of highly polished green marble. When the house is called to order each day, the sergeant at arms or one of his deputies places upon the pedesauthority in the house. When the body adjourns he removes it and keeps it in safety until the house meets again.

This mace is of very ancient and honorable origin. Under the old Roman republic the magistrates passed on foot from one place to another administering justice, trying public offenders and imposing penalties.

Each of these magistrates was attended by a small body of men known as lictors, whose duty it was to make way for the officers of the law, preserve order, make arrests and inflict punishment on condemned citizens.

Each of these lictors carried with him a bunch of rods tied together with thongs and having an ax bound to the outside of it. The thongs were used for scourging and the ax for beheading. Sentences imposed by the nagistrates were at once carried out. Those bundles of rods were known as fasces. When the Romans conquered Britain the use of the fasces as a symbol was brought with them, and many other Roman customs remained with the British people.

While it was no longer used for inflicting punishment, it continued to be used as a symbol by the early English magistrates, and when an officer appeared carrying the fasces his authority was immediately accepted by It was, in effect, his badge of

The English form of the fasces was slightly changed in that the ax was placed inside of the bundle of rods. with the blade protruding from the

The great councils of the early Saxons gradually developed into one general body, which in the fourteenth century became known as the house of commons. In all these earlier councils the use of the fasces was continued, but it then came to be known as the mace, which has remained as "But why should you want a private | the emblem of legislative authority in that body down to the present day. The house of representatives of the

after the house of commons by the framers of our constitution, and the usage of the mace was borrowed from the English custom. The first mace adopted by the house

was destroyed by fire when the British burned the capitol in 1814. From 1814 until 1842 a mace of painted wood did service, but in the latter year the present mace was made after the model of the original one.-Cleveland Plain
