ATHLETIC FIELD LAID IN TILE.

President Ferrin Grants Half Holiday for cause of Athletics. Sixty Boys Toil in Trenches.

Thursday afternoon President Ferrin granted a half holiday for the purpose of aiding the cause of athletics. More than fifty loyal sons of the institution donned their working clothes and appeared with their shovels ready for action on the athletic grounds at one o'clock. The task set before this army of willing hands was the digging of two large ditches paralleling the circular track. These parallel trenches nearly a half mile in length, laid in tile will completely drain the track. By this improvement Pacific has the driest and the best athletic field in the state.

The shovelers were divided into small squads stationed along the entire line of work.

Herbert Hayes Arnston, the manager of track athletics, by consistently applying himself all afternoon, made the great drops of perspiration flow down his face in small rivulets.

C. D. Mason plied the steel spoon with telling effect. From the amount of dirt that was moved by this human dredge you might wonder why the government has not secured his services on the Great Panama Ditch.

Captain Humphreys of foot-ball, decked in his railroad costume, conducted the work at the "Culubera cut." Here the high-top shoe brigade worked in mud and mire to set the congested waters free.

Mr. A. C. Allen, the strong man from Beaverton, worked at the confluence of the ditch, urged on by his cousins standing on the side lines.

H. E. Witham, business manager of the Index, vigorously applied the iron ladle, making the distance by the grand stand in 2.04 time.

Football manager, J. R. Ward, carried the shovel for a gain of fifty yards by the Gymnasium. Time and again he sent the steel spoon through for gains of ten and fifteen yards.

"Watt," the faithful supporter of all worthy student enterprises, ploughed his way through mother earth like a Northern Pacific snow shovel.

The five Abraham brothers did splendid work.

Prof. Chambers represented the faculty. He was one of the first ones on the field and the last to leave it.

President Ferrin, assisted by Mr. Imlay, with the engineering instruments made several levels of the trenches so that no extra shovels of earth were removed. The work progressed rapidly.

Several of the young ladies greatly assisted by carrying water to the boys. Also they served a large basket of doughnuts and hot coffee provided by Pres. Ferrin.

Every man that appeared with a shovel came to work. From one o'clock until five this crowd of whole souled students forgot studies and engaged in this vigorous exercise.

The Third Year Class Party.

Friday evening at the home of Dwinell Clapp, the third year class enjoyed one of their most delightful parties.

When each guest had arrived with a package containing a small article, ten minutes were spent in trading them with each other. Then one at a time they were opened before the guests. One of those causing the most merriment, was a penny wrapped and tied in many papers, then put in a flour sack. After each package had been opened the guests were divided into three groups, each of which gave an original play.

Group one represented a fourth year class election.

Group two, Professor Orr's third year rhetorical class.

Group three, two members of the third year class, while on a stroll through Lover's Lane.

After this, followed "The Spring Opening" where each boy was to select and trim hats for two girls. A prize was offered for the best trimmed hat, of which Mr. Mobley was the winner. He is certainly to be congratulated for his artistic taste.

While refreshments were being served Dwinell Clapp favored the guests with a violin solo.

REV. A. B. SNIDER DELIVERS ADDRESS TO SOCIAL UNION

Graphically Describes the Ancient Ruins of Egypt and Palestine. Pyramids a Mystery.

The Social Union held its second meeting at Herrick Hall, Friday evening. After a short business meeting the address of the evening was given by Rev. A. B. Snider, of the class of 1891. His subject was "A Trip Through Egypt and Palestine." By way of introduction he gave a few of the impressions gained by a traveler in making a trip around the world. He then told briefly of the countries visited before reaching Egypt. His tour in Egypt included Port Said, Alexandria, Old Memphis and Gizeh. In Egypt, he says, the traveler is always brought face to face with the past. The great pyramids, the Sphinx and the ruins of cities all tell of a very ancient civilization. Work is now being done there under the supervision of archaeological societies. Many of the ruins are being dug out of the sand which has covered them for centuries. The population of Egypt is very heterogeneous and this has in a very large measure retarded its development.

From Egypt he crossed over to Palestine, where, of course, everything suggested the Bible narrative. Jerusalem is much the same as it was in the time of Christ. The old walls are still standing and within the city one sees the same steep narrow streets. The villages of Bethany and Bethlehem, the Mount of Olives and the Dead Sea, were all very graphically described. He took a trip from Jerusalem to Jericho over the same road that Jesus traveled many times. Throughout the whole address his pictures were so clear and distinct that the listener could easily imagine himself amid the same scenes as the speaker.

After the usual informal discussion following the address, refreshments were served.

MINSTREL SHOW UNDER WAY.

Preparations Being Completed for the "Dark Town Company."

The Minstrel Show to be given in a short time by the students, is being pushed with all possible speed. The program has been definitely arranged, and all that remains to be done is the working out of the details.

The minstrel proper will consist of jokes by witty end men, solos by several members of the company, duets, trios, quartettes and a chorus of sixteen male voices.

A special feature of the entertainment will be a boxing match. A preliminary contest of three rounds has been secured between "Sluggar" Fowler and "Long Kirk." Then probably a five round match between two men will be pulled off as the chief feature of this part of the program.

The closing performance is a short scene presented by four people. It is funny, mirth provoking, and to the point. Prof. Orr's company is at present completing the details. The proceeds of the minstrel will go to the athletic fund.

SENIOR CLASS MEETING.

Stormy Session Over Election of Officers—Young Ladies Control Polls.

Room "J" last Monday was the scene of a very stormy session of the Senior Class. The young ladies of the class made full use of their franchise powers. They practically controlled the election, they placed the candidates in the field, closed the nominations and counted the ballots.

Mr. Robert Alexander Imlay was unanimously elected to the office of president. Mr. Imlay is Scotch, impulsive, kindhearted, and ready at all times to do his part. He has always taken an active interest in student affairs. Undoubtedly the class will be guided safely under his regime.

Miss Heidel was elected vice president. Her talent along dramatic lines needs no comment. She is of Teutonic origin. She is et wie eine Blume.

Miss Frances Benton Clapp was elected secretary and class poet. She has lived in this country long enough to be classed as an American. She has made music and poetry her special

study and incidentally has taken a college course.

Miss Clapp a model student is, We can profit by her example. Her playing is like Paderewski, — Of her poetry this is a sample.

Miss Clapp, besides writing a lyric to the immortal fame of the senior class, will have charge of all the correspondence.

For treasurer, Miss Silverman received the plurality vote. After a thorough discussion of the different candidates for this office, the good honest qualities seemed to stand out more prominently in her than in the other contestants. Miss Silverman had charge of the money collected from the fines that has flowed into the coffers of the library for the past eight years and not the least discrepancy has been discovered in the books.

Mr. D. I. Aller landed the office of Sargeant-at-Arms. Mr. Aller was born in Ohio near a settlement of Shakers. He is the last of a short, robust set of Teuton-Saxon ancestors. He came west when seventeen in quest of a college education. His natural bent is medicine, but has a delicate ear for music.

Mr. Herbert Hayes Arnston, after a hard fought political battle received the majority vote for class Historian. Mr. Arnston is of Anglo-Norman blood. He has a long list of Warriors and lawyers back of him. He emigrated to the West in 1893. The first student to graduate from the Gregg School of short hand, of Chicago. In the coming generation when the biographer shall record the deeds of this Greek Lexicon, these words will be found chiseled on the marble slab that marks his last resting place, "Hic jacet, Magni nominis umbra."

The Juniors have a Fresh increase in their class at chapel.

Mr. McCoy is suffering this week with a stiff neck.

Cameras were numerous on the athletic field Thursday.

Miss Payne's mother was visiting in Forest Grove Saturday and Sunday.

Miss Frances Clapp entertained Miss Silverman at dinner Thursday evening.

Professor Taylor, who has been suffering from a sprained knee, is about recovered.

Miss Hartley left for her home in Hood River Thursday, where she will remain for a week.

The great universities of the east are erecting gymnasiums at a cost of a quarter of a million dollars.

TELLS HOW TO MIX IT.

Directions To Prepare Simple, Yet Remarkable Home Mixture.

A well known authority on Rheumatism gives the readers of a large New York daily paper the following valuable, yet simple and harmless prescription, which any one can easily prepare at home:

Fluid Extract Dandelion, one-half ounce; compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces.

Mix by shaking well in a bottle, and take a teaspoonful after each meal and at bedtime.

He states that the ingredients can be obtained from any good prescription pharmacy at small cost, and, being of vegetable extraction, are harmless to take.

This pleasant mixture, if taken regularly for a few days, is said to overcome almost any case of Rheumatism. The pain and swelling, if any, diminishes with each dose, until permanent results are obtained, and without injuring the stomach. While there are many so-called Rheumatism remedies, patent medicines, etc., some of which do give relief, few really give permanent results, and the above will, no doubt, be greatly appreciated by many sufferers here at this time.

Inquiry at the drug stores of this neighborhood elicits the information that these drugs are harmless and can be bought separately, or the druggists here will mix the prescription for our readers if asked to.

The Story of a Medicine.

Its name—Golden Medical Discovery—was suggested by one of its most important and valuable ingredients—Golden Seal root.

Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, triple-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its makeup.

A glance at the full list of its ingredients, printed on every bottle-wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experts in this country. It is advised by Medical Men who recommend them as the very best remedies for the diseases for which "Golden Medical Discovery" is advised. A little book of these endorsements has been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned diseases, but also for the cure of all catarrhal, bronchial and throat affections, accompanied with catarrhal discharges, hoarseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated, are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not perform miracles. It will not cure consumption in its advanced stages. No medicine will. It will cure the affections that lead up to consumption, if taken in time.

—Buy Wool Blankets of Bailey and keep warm.

—Try Schultz's ground bone for your hens. It will make them lay.
