About Wood Pulp.

A preliminary report of the consumption of pulpwood and the amount of pulp manufactured last year has just been issued by the Bureau of Census.

The advance statement is made from the statistics collected by the Census Bureau in co-operation with the United States Forest Service.

Many of the figures bring out interesting facts which show the rapid growth of the paper making and allied industries during the last decade. Nearly four million cords of wood, in exact numbers 3,962,660 cords, were used in the United States in the manufacture of paper pulp last year, just twice as much as was used in 1899, the first year for which detailed figures were available. More than two and one-half million tons of pulp were produced. The pulp mills used 300,000 more cords of wood in 1907 than in the previous year.

The amount of spruce used was 66 per cent of the total consumption of pulpwood, or 2,700,000 cords. The increased price of spruce has turned the attention of paper manufacturers to a number of other woods, hemlock ranking next, with 576,000 cords, or 14 per cent of the total consumption. More than 9 per cent was poplar, and the remainder consisted of relatively small amounts of pine, cottonwood, balsam and other woods.

There was a marked increase last year in the importation of spruce, which has always been the most popular wood for pulp. For a number of years pulp manufacturers of this country have been heavily importing spruce from Canada, since the available supply of this wood in the north-central

Do You Open Your Mouth
 The food or medicine may be offered you. Do you know what to do with it? Most intelligent and sensible people now-days insist on knowing what they employ whether as food or as medicine. Dr. Pierce believes they have a perfect right to insist upon such knowledge. Such publishers, and on each bottle of medicine, what his medicines are made of and what they do for you. This he feels he can well afford to do because the more the ingredients of which his medicines are made are studied and understood the more will their superior curative virtues be appreciated.

For the cure of woman's peculiar weaknesses, irregularities and derangements, giving rise to frequent headaches, backache, dragging-down pain or distress in lower abdominal or pelvic region, accompanied, oftentimes, with a debilitating, pelvic, catarrhal drain and kindred symptoms of weakness, Dr. Pierce's Favorite Prescription is a most efficient remedy. It is equally effective in curing painful periods, in giving strength to nursing mothers and in preparing the system of the expectant mother for baby's coming, thus rendering childbirth safe and comparatively painless. The "Favorite Prescription" is a most potent, strengthening tonic to the general system and to the organs distinctly feminine in particular. It is also a soothing and invigorating, nervous and curative nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea or St. Vitus's dance, and other distressing nervous symptoms attendant upon functional and organic diseases of the distinctly feminine organs.

A host of medical authorities of all the several schools of practice, recommend each of the several ingredients of which "Favorite Prescription" is made for the cure of the diseases for which it is claimed to be a cure. You may read what they say for yourself by sending a postal card request for a free booklet of extracts from the leading authorities, to Dr. R. V. Pierce, Executive, Herald and Surgical Institute, Buffalo, N. Y., and it will come to you by return post.

and New England states, where most of the pulp mills are located, is not equal to the demand. Figures show that the amount of this valuable pulpwood brought into this country was more than two and one-half times as great in 1907 as in 1899. In 1907 the importations were larger than ever before, being 25 per cent greater than 1906. The spruce imports last year amounted to more than one-third of the consumption of spruce pulpwood. Only a slightly greater amount of domestic spruce was used than in 1906.

Large quantities of hemlock were used by the Wisconsin pulp mills, and the report shows that the Beaver State now ranks third in pulp production, New York and Maine ranking first and second, respectively. Poplar has been used for a long time in the manufacture of high grade paper, but the sup-

DON'T EXPERIMENT

You Will Make No Mistake if You Follow This Forest Grove Citizen's Advice.

Never neglect your kidneys.

If you have pain in the back, urinary disorders, dizziness and nervousness, it's time to act and no time to experiment. These are all symptoms of kidney trouble, and you should seek a remedy which is known to cure the kidneys.

Doan's Kidney Pills is the remedy to use. No need to experiment. It has cured many stubborn cases in Forest Grove. Follow the advice of a Forest Grove citizen and be cured yourself.

Mrs. M. E. Dilley, living on Main St., Forest Grove, Ore., says: "My husband had complained of his back hurting him for sometime. He was no longer able to stand that he could hardly get around. The pain seemed to come severe at night and greatly interfered with his rest. Added to this, he was greatly annoyed by the frequent urination of the secretions. After using many remedies without results, he tried Doan's Kidney Pills, and in a short time he was greatly relieved. He is glad to give them his recommendation."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

ply of this wood is limited and the consumption of it has not increased rapidly.

Wood pulp is made by either one of two general processes, mechanical or chemical. In the mechanical process the wood, after being cut into suitable sizes and barked, is held against revolving grindstones in a stream of water and thus reduced to pulp. In the chemical process the barked wood is reduced to chips and cooked in large digesters with chemicals which destroy the cementing material of the fibres and leave practically pure cellulose. This is then washed and screened to render it suitable for paper making.

The chemicals ordinarily used are either bi-sulphide of lime or caustic soda. A little over half of the pulp manufactured last year was made by the sulphite process, and about one-third by the mechanical process, the remainder being produced by the soda process. Much of the mechanical pulp, or ground wood as it is commonly called, is used in the making of newspaper. It is never used alone in making white paper but always mixed with some sulphite fiber to give the paper strength. A cord of wood ordinarily yields about one ton of chemical pulp.

For Sale.

I have some dry, big fir wood and No. 1 cedar posts for sale. Ind. Phone 261. Ed. Boos. 4914.

THATCHER

A daughter was born to Mr. and Mrs. Jacob French on the 22nd of May.

People of Thatcher are anxious to have something doing about the motor line.

The County Judge was out to Thatcher last week looking after the work that is being done on the road.

The farmers are all well pleased with the road and all feel that the Judge is entitled to much praise for the same.

Mr. and Mrs. M. L. Roberts left Tuesday, June 2nd for Portland to visit their son and attend the Rose Carnival.

H. H. Graham and wife left here May the 28 for St. Johns to attend the Adventist camp meeting. They will return today.

Mr. Warren Thatcher called at the home of Fred McElliott last week. He brought some very fine strawberries, raised by M. Schafer. Twenty of them weighed one pound.

H. H. Graham sold eight acres of land to Mr. J. Killen for \$1200. Land is advancing in price at a rapid rate. M. C. Roberts refused \$1600 for his eight acres last week.

Thatcher people say they have not heard anything from the committee that was appointed by the Board of Trade to confer with the citizens of Thatcher and vicinity in regard to a motor line.

—Don't forget that Hoffman & Allen Co. carry the famous Butterick Patterns and sell Delineators, also take subscriptions for same.

—Money to loan on farm security W. H. Hollis.

The News \$1.50 per year in advance.
